Years of design with constant development and testing ensure that YONEX footwear delivers the ultimate in performance, reliability and comfort. The smallest details can make the difference between triumph and defeat.

That's why YONEX footwear is trusted by champions to deliver match-winning results.

**FLEXION UPPER**

New asymmetrical upper design for a better and more comfortable fit. Eyelets in the upper shoe follow the curved shape of the instep, hugging the foot and allowing all of the stress on landing to be absorbed through the toes and instep giving you confidence in your footwork.

**DURABLE SKIN**

Flexible Durable Skin retains the shape of the upper shoe to help prevent any lateral movement of the foot.

**3-LAYER POWER CUSHION**

Higher-density top and bottom layers help the 3-Layer POWER CUSHION absorb 30% more shock than the original POWER CUSHION.

- Provides 3% more repulsion than the original POWER CUSHION
- Converges shock energy into power for fast and light footwork

- Absorbs shock & reverses impact energy
- Smooth energy transfer into next movement
- Lightweight for comfort
- 3 times more shock absorption than Urethane

**QUATTRO FIT: SHAPED SHOE TECHNOLOGY**

The Quattro Fit System from YONEX addresses the four key areas that impact on fit.

- Designed to reduce the excess space at the front of the shoe that is created by the smaller toes. Shaped shoe technology improves grip and power transfer when accelerating or stopping.
- Re-shaped design at the heel and the mid-foot ensure the foot is held firmly for quick response and direct footwork.

**FOOTWEAR**

The smallest details can make the difference between triumph and defeat.

That's why YONEX footwear is trusted by champions to deliver match-winning results.
SHB02LTD
Asymmetrical fit secures and supports the foot, giving greater stability for faster, more accurate footwork
Colour: Bright Red
Made in China

SHB-02MX
Asymmetrical fit secures and supports the foot, giving greater stability for faster, more accurate footwork, for men
Colour: Blue
Made in China

SHB-02LX
Asymmetrical fit secures and supports the foot, giving greater stability for faster, more accurate footwork, for women
Colour: Coral Orange
Made in China

SHBF1NLTD
Lightness and stability for sharper footwork
Colour: Shine Yellow
Made in China

SHBF1NMX
Lightness and stability for sharper footwork, for men
Colour: Emerald
Made in China

SHBF1NLX
Lightness and stability for sharper footwork, for women
Colour: Bright Pink
Made in China

SHB87LTD
Elite performance shoe with improved fitting and landing stability
Colour: High Orange
Made in China

SHB-87EX
Improved fitting and landing stability provide sharper movements
Colour: Red/White, Red/Black
Made in China

SHBF1NLX
Lightness and stability for sharper footwork, for women
Colour: Bright Pink
Made in China

SHBF1NLX
Lightness and stability for sharper footwork, for women
Colour: Bright Pink
Made in China

SHBSC6iEX
Ultimate cushioning with a snug fit
Colour: Lime Yellow
Made in China

SHBSC5MX
Ultimate cushioning with low-cut, for men
Colour: Navy/Orange
Made in China

SHBSC5LX
Ultimate cushioning with low-cut, for women
Colour: Coral Orange
Made in China

SHBSC6iEX, SHBSC5MX, SHBSC5LX, SHBSC2iEX
Improved cushioning with thick sole design. Compared with conventional model, the shock to your knee is reduced by 20%.

ULTIMATE CUSHIONING
SHBSC6iEX, SHBSC5MX, SHBSC5LX, SHBSC2iEX
Improved cushioning with thick sole design. Compared with conventional model, the shock to your knee is reduced by 20%.
**FOOTWEAR**

**SHB-75EX**
- Comfortable soft fit with lightweight low-cut design
- Colour: Black/Yellow, Red, Yellow/Turquoise
- Made in Vietnam

**SHB-45EX**
- Basic model with comfortable soft fit
- Colour: Red, Blue
- Made in Indonesia

**SHB-33EX**
- Gentle on feet and joints with good grip
- Colour: Black/Yellow
- Made in Indonesia

**SHB01JREX**
- Gentle on feet and joints for younger players
- Colour: Bright Red
- Made in China

** MIDSOLE **

- ToughGuard III: Extremely durable wear-resistant synthetic leather.
- Durable Skin: A polyurethane material offering improved high-shape retention, wear-resistance and heat-resistance.
- Double Russel Mesh: Highly breathable open mesh.
- Lateral Claw: Reduces power loss when pushing hard against the court and improves stability by strengthening the sides of the shoe.
- Lateral Shell: Installed on the outer area of the upper, it prevents sliding at the edge of the sole.
- TPE: Ensures the foot easily twists while in movement.
- Footbed: The insole provides cushioning and shock absorption.

** INSOLE **

- Synchro-Fit Insole: Offering extra support around the front of the heel and reducing the gap between the foot and shoe, the Synchro-Fit Insole ensures maximum grip and responsive comfort and performance.

** SOLE **

- Hexagrid: For agile and stable footwear, the Hexagrid pattern provides 35% more grip and is 20% lighter than standard sole material.
- Round Sole: The VADER Round Sole is designed to provide a wider support for quick and smooth movement. The Round Sole ensures smooth movements and the transfer of maximum energy.
SAFERUN running shoes use industry-leading construction and cushioning technology from YONEX to improve efficiency, increase comfort and reduce the risk of knee injury.

A raw egg will rebound 4 meters without breaking when dropped from 7 meters onto a POWER CUSHION mat.

Knee function is affected by physical changes.

- People in their 40's and 60's have 40-50% less knee joint cartilage than people in their 20's.\(^1\)
- Weight gain increases the load on legs by 2.8 times. If a 20-year-old, 64kg male gains 10kg by his 40's, the load on his legs will increase by approximately 3 times to 28kgf.\(^2\)

**POWER CUSHION**

Steps with zero ankle flexion prevent fatigue and missteps due to unsteady landings. The Toe-Light Design aids natural landings with no ankle flexion.

Weight gain increases the load on legs by 2.8 times. If a 20-year-old, 64kg male gains 10kg by his 40's, the load on his legs will increase by approximately 3 times to 28kgf.\(^2\)

Aimed at users with a less muscular build, the balance point is located 15mm closer to the heel from the shoe’s centre for a lighter toe section and ideal landing angle. Tested with size 26.0cm shoes.

**SAFERUN TECHNOLOGY**

Optimum foot landing angle for maximum stability

Two technologies that convert the impact on landing into momentum

- SAFERUN 800 features the POWER CUSHION at the heel. The rounded shape offers smoother movement and reduced impact on landing.
- The integrated diagonal suspension is designed to give the ideal landing by directing heel contact from the outside of the sole to the inside, straightening the lower leg.

---

\(^1\) According to a study by Shinichiro Ishii, Associate Professor at Kanagawa University of Human Services, et al.

\(^2\) kgf is the metric unit of gravitational force exerted by one kilogram of mass.

**Boa® Closure System**

Easily put on and take off your shoes with the Boa® Closure System. In place of shoelaces, SAFERUN 900 running shoes feature wire laces that can be adjusted with a dial. Without the hassle of tying and untying shoelaces, the shoes can be fitted precisely to your feet. When loosening the shoes, pull up the dial, pull on the Easy Tab, and the shoe opens up in an instant.
