FAR BEYOND ORDINARY

To go far beyond ordinary begins with curiosity,
Toward a horizon of boundless blue and grounding green,
filled with endless possibilities.

The sky invites us to imagine beyond what we can see,
While the ground keeps us steady, guiding each decision
with purpose.

Progress here is rarely linear,
always accelerating and decelerating—
Where grand ideas meet meticulous exploration,
turning the unusual into the essential,
Transforming raw energy into pinnacle power.
It's crafted in milligrams and millimeters—
A balance of graphite, resin, and paint, each layer fine-tuned,
Every fiber placed to bring out the best in every swing.

Walking with a rhythm of quick trials,
insights gained, and constant refinement,
A quiet resolve to push forward when pausing would be easier.
The horizon doesn't take us to a single destination—
it sets us on a journey.

A journey where going far is about seeing
challenges as opportunities,
And believing the entrance to the next breakthrough
is always closer than we think.

far beyond ordinary

OUR RANGE OF

racquets

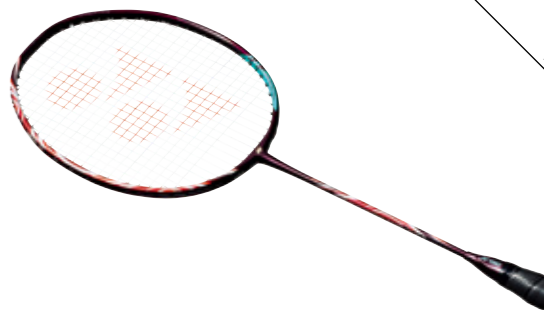

“Engineered for your game.”

Badminton racquets were the start of the Yonex journey into sports. With each racquet developed, our vision became clearer. We learned the fun of crafting world-class racquets alongside the most elite players and now, we strive for innovative racquets that help every athlete achieve new speeds and new heights.

We believe the best performance cannot be prepared with just any ingredient. Every gram, every millimeter can be the deal-maker or breaker. That's why we source the highest quality advanced graphite for our chefs to personally cook up into each individual masterpiece.

NANOFLARE

SPEED

RACQUET SELECTOR

ASTROX **ARC SABER** **NANOFLARE**

HEAD-HEAVY

Initiate a relentless attack with devastating steep smashes.

EVEN-BALANCE

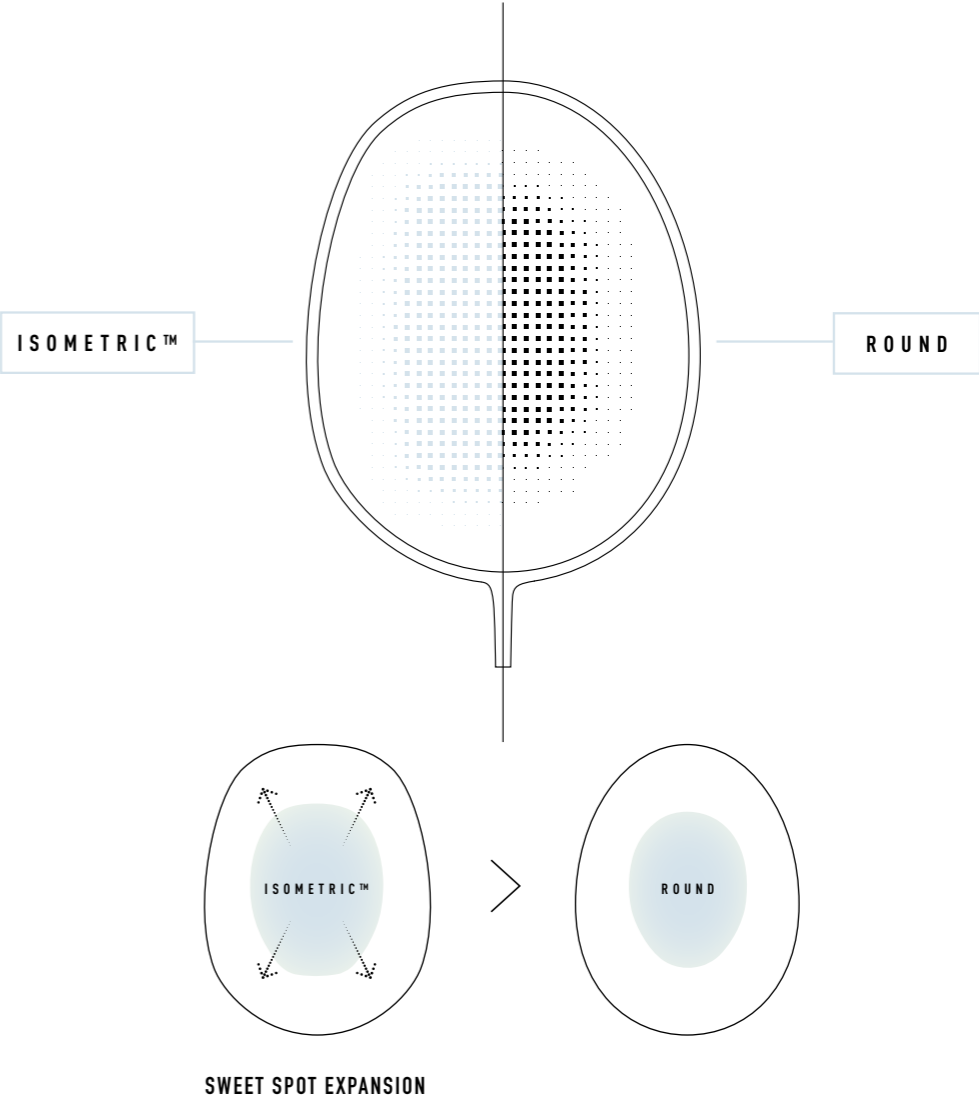

Command the game with feel and precision.

HEAD-LIGHT

Access rapid fire speed on every shot in a head-light racquet built for power.

ISOMETRIC™

SIGNATURE YONEX TECHNOLOGY SINCE 1980*

ISOMETRIC™ technology was invented by Yonex to maximize the vital sweet spot area and is now a world-leading feature of our racquets. The square shaped head of the racquet means that there are more strings crossing at right angles, resulting in a bigger sweet spot. Yonex continues to develop and enhance ISOMETRIC™ power, reducing still further the 'inert' space around the edge of conventional racquets, creating a far bigger sweet spot than other frames.

ISOMETRIC™ is a trademark of Yonex Co., Ltd. *Tested by Yonex

*Originally developed for tennis racquets, in 1992 Yonex released the first ISOMETRIC badminton racquet.

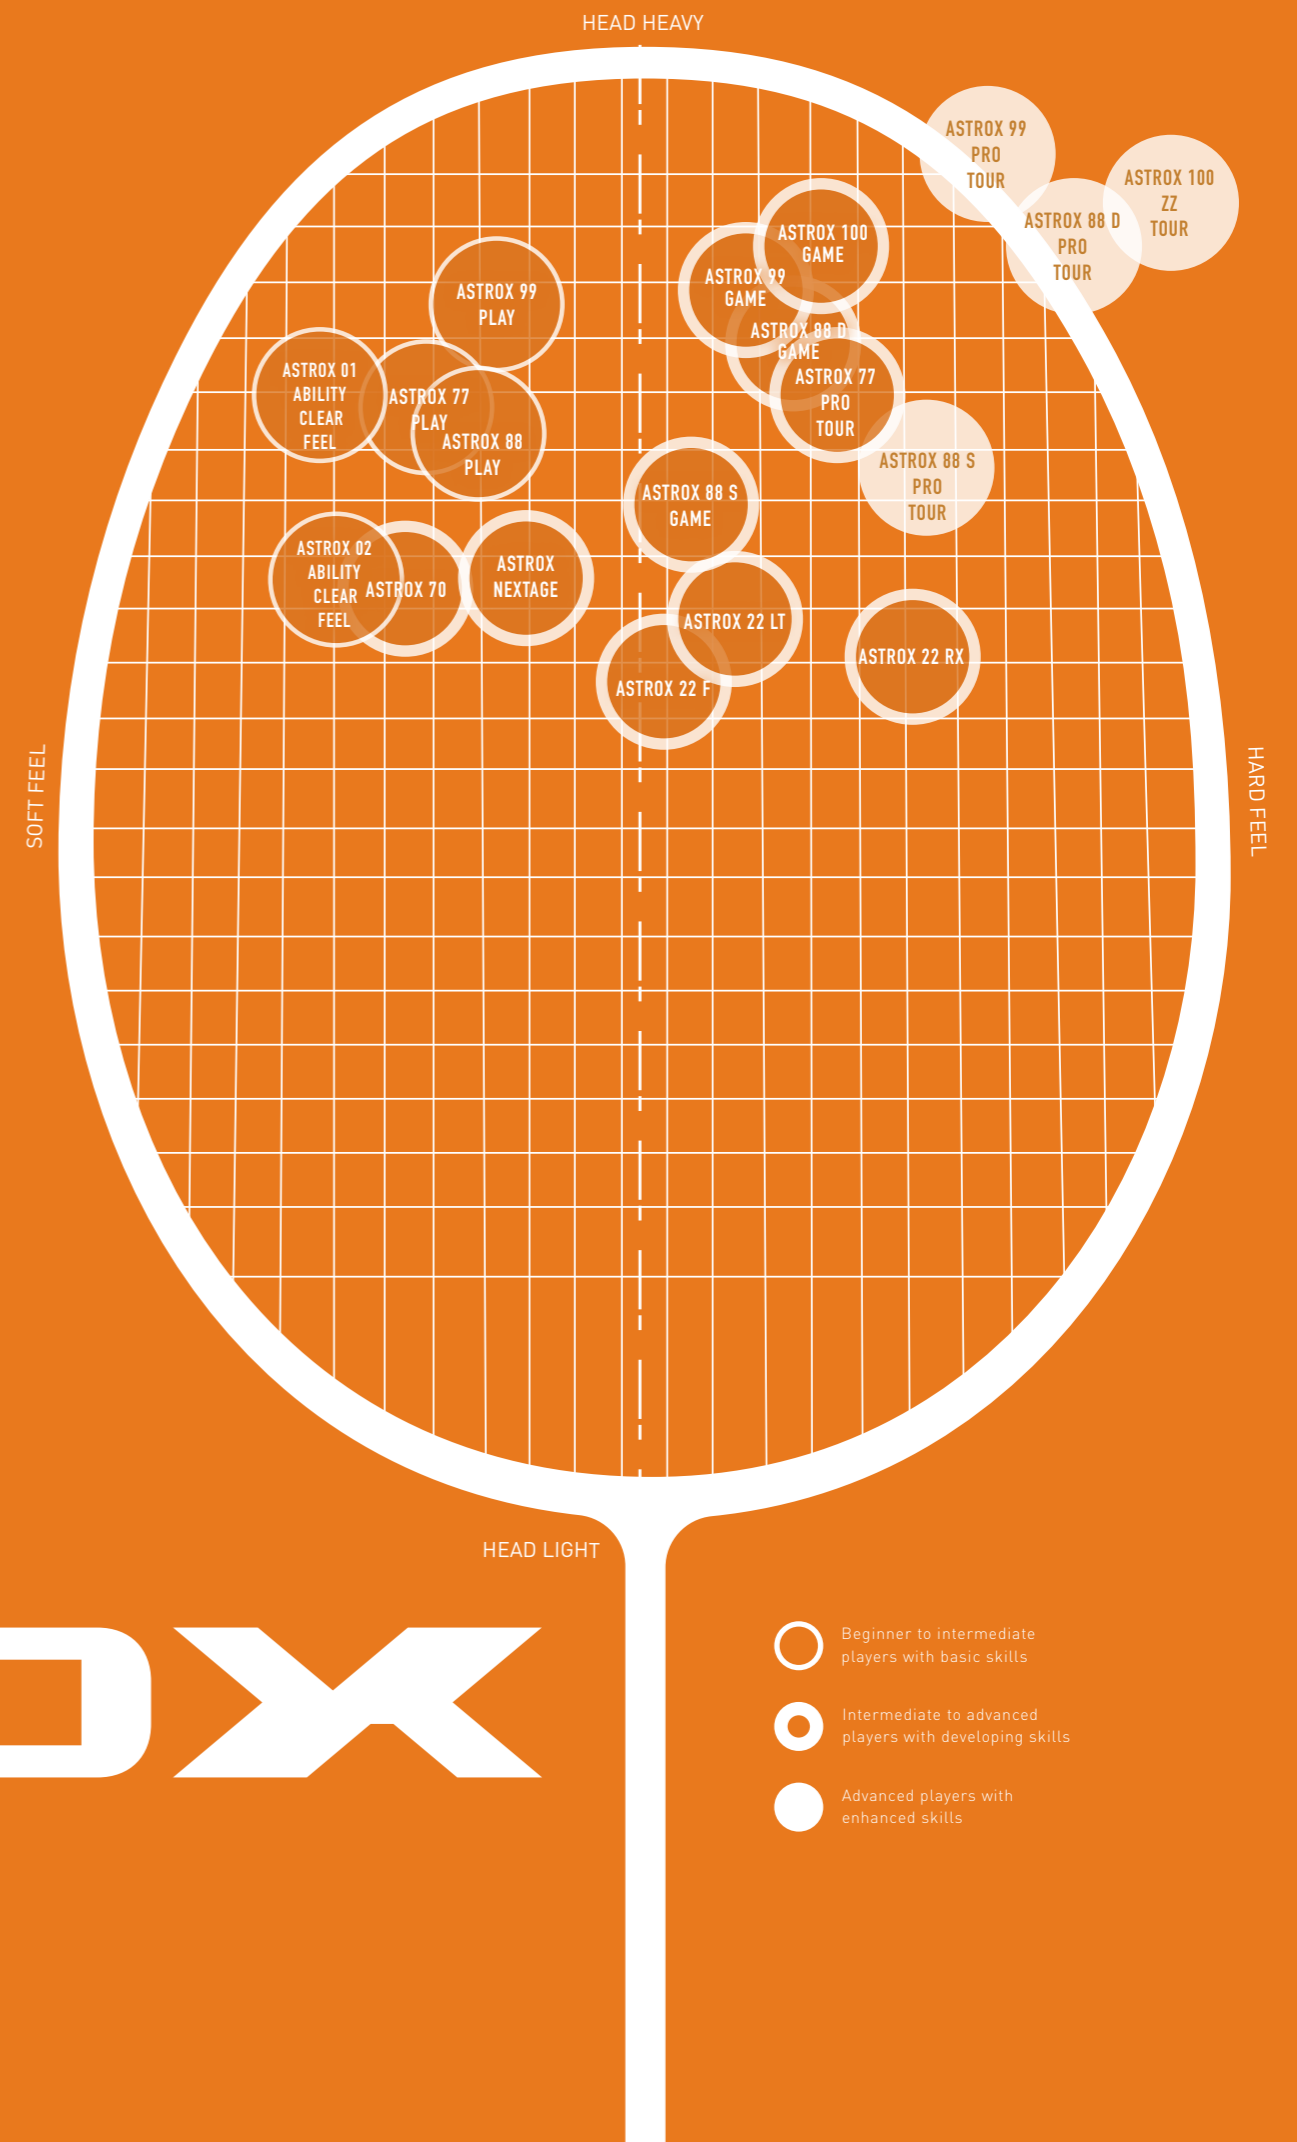

INITIATE A RELENTLESS ATTACK

The Rotational Generator System perfectly distributes weight through the grip end, frame top and the T-joint for maximum control, enabling smooth transition between shots, in a rapid succession. Revolutionary graphite materials such as Namd™* are utilized to create faster snapback for imposing power.

ASTROX

ASTROX

ASTROX 100ZZ

Hyper Slim Shaft

Yonex's slimmest shaft ever features a solid core with revolutionary material, Namd, to provide greater flex and snapback performance while also reducing air resistance for faster swings.

Namd™

Utilizing high quality Namd™ graphite throughout the frame produces more flex with a faster snapback, unleashing dramatic steep power.

Rotational Generator System

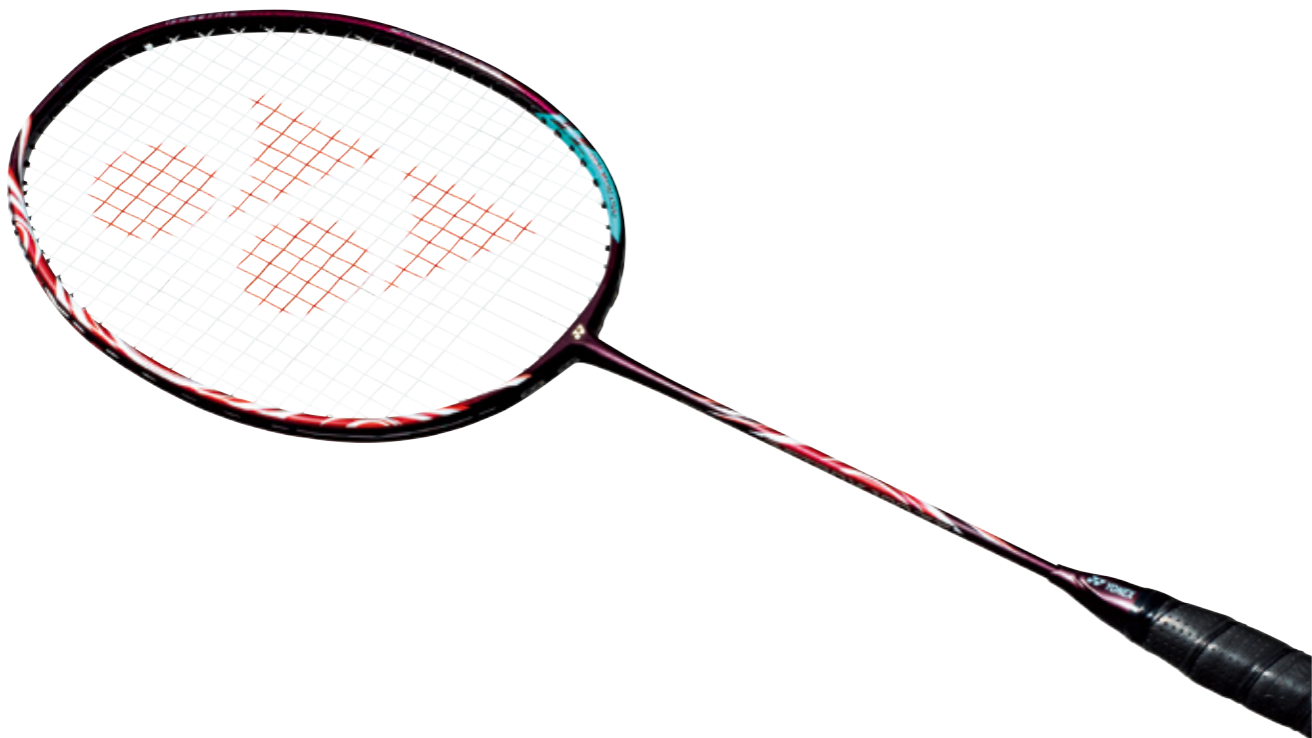

By applying the counterbalance theory, weight is carefully distributed throughout the grip end, frame top and joint, enabling a smooth transition between powerful shots for rapid, successive attacks.

AN SE YOUNG (KOREA)

ACCURACY

MASTER OF PRECISION

The acclaimed ARCSABER series designed for control is reimagined with emphasized shuttle-pocketing for a controlled offense and one-of-a-kind feel at impact.

Taking control of the court can come in all different forms. For the ARCSABER, that comes from the extra few milliseconds of shuttle contact time, allowing assertive shot-making. Combine that with the stability of the enhanced ARCSABER frame, and you gain the confidence to command the court.

ARCSABER
ARCSABER

ARCSABER 11 PRO

Enhanced Arcsaber Frame

Control with confidence through this unique frame structure with varying levels of flex from top and sides, to bottom. Built to increase shuttle hold while reducing instability and twisting at impact.

Control-Assist Bumper

The CONTROL-ASSIST BUMPER attached at the top contains T-ANCHOR micro-sized tetrapods that help lock in vertical strings for improved accuracy.

Pocketing Booster

The top of the frame is lined with a POCKETING BOOSTER, a proprietary rubber-like material emphasizing elasticity in the frame's flex.

THINAAH MURALITHARAN (MALAYSIA)

SPEED

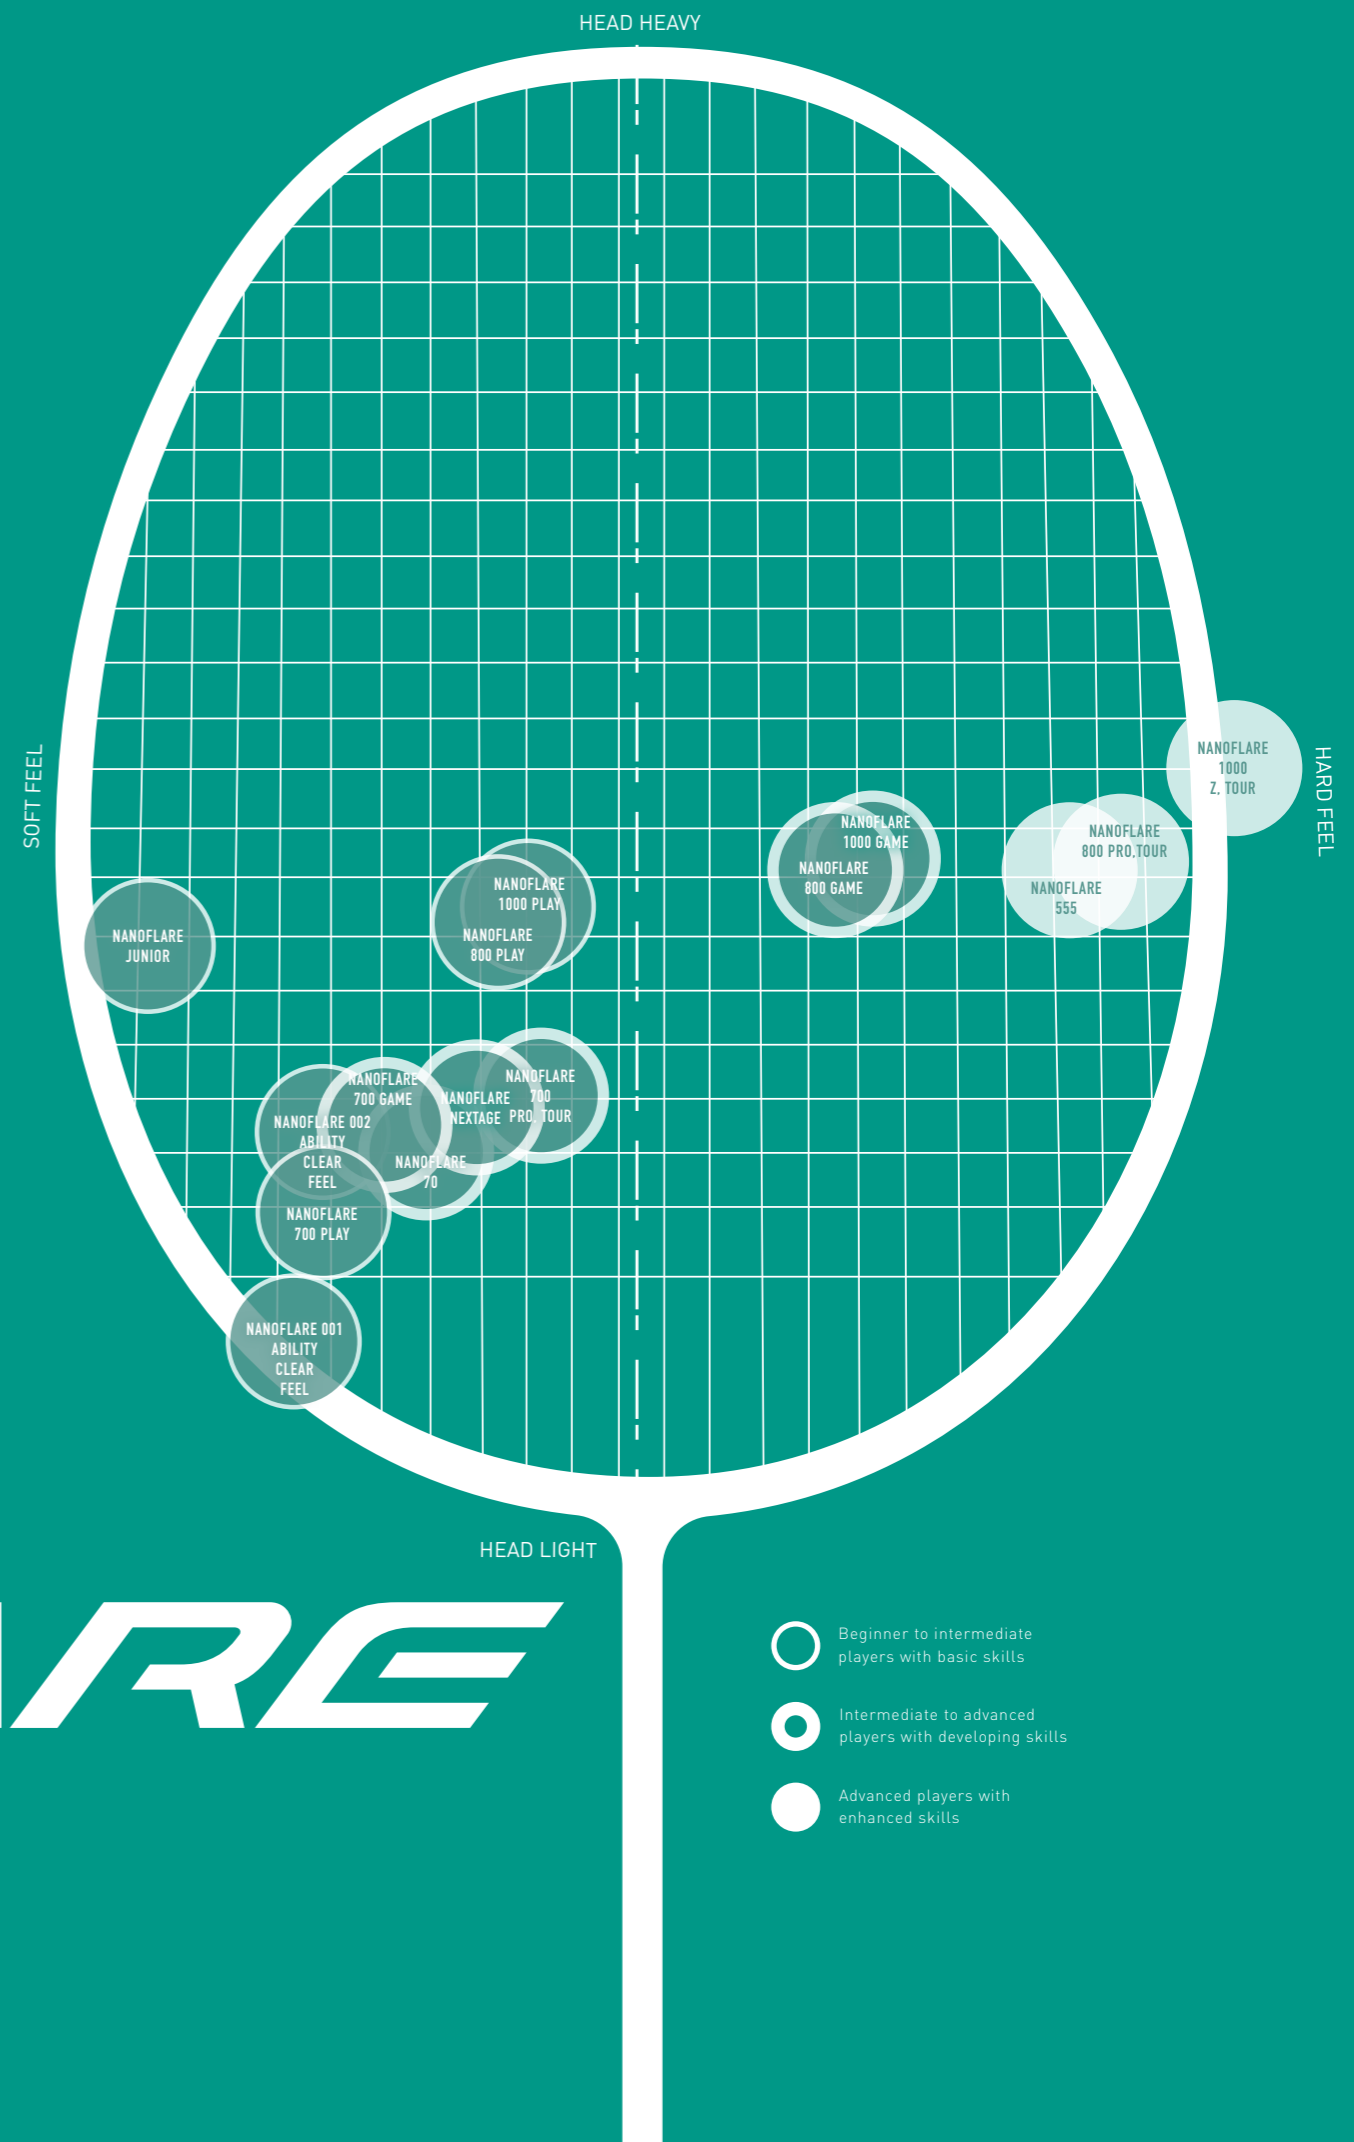

MAXIMUM SHUTTLE ACCELERATION

Engineered to improve swing speed and maneuverability, the NANOFLARE is the only head-light racquet proven to provide unrivaled power and increased shuttle acceleration.

The difference is in the technology – built for speed, the NANOFLARE, is constructed with the SONIC FLARE SYSTEM which strategically lines high modulus graphite material at the top and bottom of the frame for amplified repulsion performance.

NANOFLARE

NANOFLARE

NANOFLARE 700 PRO

Wide Profile Frame

The wide profile of the NANOFLARE frame reduces warp during the swing, amplifying repulsion.

Frame Dedicated for Clears

Precise material placement increases rigidity at the top of the frame, while the steep angle at the bottom of the frame also reinforces rigidity to heighten repulsion, resulting in enhanced speed and flight of clears.

Sonic Flare System

Carefully selected high modulus graphite are strategically placed across the bottom of the frame to provide unrivalled power and stability for maximum shuttle acceleration.

Servo Filter*

Epoxy resin film with flexibility and vibration dampening properties, provides faster vibration dampening than graphite alone. Removes unwanted vibrations to leave a clear and mild hitting feel.

*SERVO FILTER is a vibration-absorbing film developed by theMitsubishi Chemical Group, which has high bonding properties withgraphite and excels in both flexibility and durability.

NANOSCIENCE

NANOSCIENCE technology allows Yonex to alter the structure of materials in a racquet to enhance the **STRENGTH, FLEX and POWER**.

M40X

A next-generation highly strong, yet elastic carbon fiber developed by Toray Industries, Inc. (TORAYCA™ M40X is developed by Toray Industries, Inc.)

Namd™

A world-first, new dimension graphite material, Namd™, produces more flex with a faster snapback, unleashing dramatic power. (Namd™ is a technology developed by Nitta Co., Ltd.)

2G-Namd™ FLEX FORCE

New graphite characterized by its quick flex and snapback. The CARBON NANOTUBE binding the graphite together reduces energy loss and enhances its resilience.

MATERIAL HIGHLIGHTS

BLACK MICRO CORE

A stiff, high-density vibration-dampening material featured in the upper half of the frame, allowing players to hit with a solid feel and power.

CFR/CSR

A new material combining the flexibility of rubber with the repulsion of carbon graphite. Enhances both shuttle hold and repulsion.

FLEX FUSE

The shock absorbing resin used in the joint creates a comfortable hitting feel.

FRAME

AERO FRAME

Cuts air resistance for faster swing speeds and increased maneuverability.

AERO+BOX FRAME

A combination of faster swing speeds and a solid feel.

BOX FRAME

The extra stiff profile provides a solid stable feel on impact with the shuttle.

COMPACT FRAME

Reduced air resistance and improved feel with the shuttle.

CONTROL-ASSIST BUMPER

The CONTROL-ASSIST BUMPER attached at the top contains T-ANCHOR, micro-sized tetrapods that help lock in vertical strings for improved accuracy.

DUAL OPTIMUM SYSTEM

Two contrasting racquet profiles in one unique Dual Dynamic Design allow players to enhance both their forehand and backhand.

DUORA GROMMET DESIGN

8 linked grommets made with differing thickness on either side of the frame. The stiffer AERO side grommets pull the string harder for increased power.

DURA FRAME

Provides aluminum frames with greater strength and a solid feel.

ENHANCED ARCSABER FRAME

Control with confidence through this unique frame structure with varying levels of flex from top and sides, to bottom. Built to increase shuttle hold while reducing instability and twisting at impact.

NANOCELL NEO

A resilient yet surprisingly flexible graphite material providing increased power.

NANOMESH NEO

Ensures a stronger more flexible frame, while increased shaft flex creates maximum power.

2G-NANOMESH NEO

Characterized by its quick flex and snapback, maximizes shot power.

EX-HYPER MG / HYPER-MG / EX-HMG / SUPER HMG

These ultra-elastic materials produce sharper power for all shots.

LIGHT FEEL CARBON NEO

The additional rubber creates a lighter feel and increased flex for greater head speed.

POCKETING BOOSTER

A proprietary rubber-like material emphasizing elasticity in the frame's flex.

EXPANDED SWEET SPOT FOR CONTROL

The tailored 5mm longer racquet length enables fast maneuverability, while the expansion of the sweet spot area by optimizing the frame design increases precision. Supports fast rallies and secures points from front court attacks.

FRAME DEDICATED FOR CLEARS

Precise material placement increases rigidity at the top of the frame, while the steep angle at the bottom of the frame also reinforces rigidity to heighten repulsion, resulting in enhanced speed and flight of clears.

FRAME DEDICATED TO DRIVES

The steep angle from the stringing area to the T-joint at the bottom of the frame, increases rigidity and enhances repulsion, enabling powerful drives that take the opponent by surprise.

HORIZONTAL-A CONCEPT

Larger sweet spot at the top of the frame in a compact head design.

MEGA FRAME

The larger frame design makes it easier to hit the shuttle.

MUSCLE POWER FRAME

Smoother grommets reduce string stress for greater durability.

POWER-ASSIST BUMPER

Boosted power with a Tungsten-infused weighted bumper, adding 55%* more weight than conventional grommets. The POWER-ASSIST BUMPER enhances the Rotational Generator System, quickly transferring more weight to the shuttle.

*Measured by Yonex

NANOMETRIC

Tightly bonded fibers enhance the racquet's strength and minimize twisting during impact. NANOMETRIC is a material which applies the NANOALLOY™ technology of Toray Industries, Inc.

NANOMETRIC DR

An enhanced graphite based on unique NANOSCIENCE technology for a firm shuttle hold creating maximum repulsion.

SERVO FILTER

Epoxy resin film with flexibility and vibration dampening properties, providing faster vibration dampening than graphite alone. Removes unwanted vibrations to leave a clear and mild hitting feel.

T-ANCHOR

Increases stiffness for quicker racquet recovery into the next shot.

TUNGSTEN

A metal with a high tensile strength.

VDM (VIBRATION DAMPENING MESH)

Vibration dampening material is a stretchy mesh rolled with the graphite to greatly reduce unwanted vibrations.

ROTATIONAL GENERATOR SYSTEM

By applying the counterbalance theory, weight is distributed throughout the grip end, frame top and the joint for maximum control. The transition to the next shot can be performed smoothly with a rapid succession.

SOLID FEEL CORE

Reduces vibrations traveling down the shaft for improved comfort.

SONIC FLARE SYSTEM

Carefully selected high modulus graphite are strategically placed across the bottom of the frame to provide unrivalled power and stability for maximum shuttle acceleration.

SPEED-ASSIST BUMPER

The connected grommet at the bottom of the frame amplifies shuttle repulsion. The high strength titanate material mixed into the bumper reinforces the frame and limits deformation, generating a higher initial launch and increases speed.

STABILITY WEIGHT DISTRIBUTION

The added weight distribution on the sides of the frame enhances stability during the swing, resulting in maximized smash power. This allows for the effective breakdown of defenses during back-court attacks.

STRINGING PATTERN FOR ENHANCED REPULSION

String density increases by adding an extra cross string, boosting surface pressure and creating enhanced repulsion for accelerated drives.

WIDE DIAMETER GROMMETS

Control the shuttle-release timing with larger grommets designed for more string movement, extending the shuttle contact time.

WIDE PROFILE FRAME

The wide profile of the NANOFLARE frame reduces warp during the swing, amplifying repulsion.

YONEX SPONSORED EVENTS 2025

Yonex is the official stringing partner, shuttlecock and equipment supplier at the following events throughout 2025:

JANUARY

- 1 Malaysia Open [Super 1000]
- 2 YONEX SUNRISE India Open [Super 750]

FEBRUARY

- 3 Thailand Masters [Super 300]
- 4 YONEX German Open [Super 300]

MARCH

- 5 YONEX All England Open Badminton Championships [Super 1000]
- 6 YONEX Swiss Open [Super 300]

MAY

- 7 YONEX Taipei Open [Super 300]
- 8 Thailand Open [Super 500]
- 9 Malaysia Masters [Super 500]

JUNE

- 10 YONEX US Open [Super 300]

JULY

- 11 YONEX Canada Open [Super 500]
- 12 Japan Open [Super 750]

AUGUST

- 13 BWF World Championships

SEPTEMBER

- 14 Korea Open [Super 500]

OCTOBER

- 15 Arctic Open [Super 500]
- 16 YONEX French Open [Super 750]

NOVEMBER

- 17 Korea Masters [Super 300]
- 18 Kumamoto Masters Japan [Super 500]
- 19 Syed Modi India International [Super 300]

OUR RANGE OF strings

“Crafting every sweet spot.”

Choosing the right string is as important as choosing the right racquet. That is why Yonex engineers put so much effort into designing innovative new products like the EXBOLT, a next-generation multifilament string. The EXBOLT is engineered with the proprietary FORGED FIBER, a thin yet radically durable outer, allowing the player to pierce through their opponent's defense with agile and high-velocity drives.

Innovation lies in the smallest details. Yonex never stops meticulously testing cutting-edge fibers and coatings, finding more efficient ways to craft stronger strings for every performance preference and level of play.

SKYARC

ATTACK THE BACKCOURT WITH ACCELERATED HIGH CLEARS

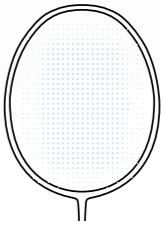

HIGH SLING FIBER
Softer and more resilient than nylon. 16% higher new material. Produces a large jump.

COMPACT FILLED STRUCTURE
High density resin filled structure reduces power loss and improves strength.

CATCH THE SHUTTLECOCK AND SEND IT FARTHER

EXPANDED SWEET AREA
5% Increase in maximum deflection. Maintain performance even with off center hits

IMPROVED SHOCK ABSORPTION PERFORMANCE
Reduce impact shock by up to 6.9%. Easy on your arm and elbow.

Same shuttle flight distance as conventional strings, even with 3km/h slower swing speed.

*Tested by Yonex

TECHNOLOGY

- OVAL FORGED FIBER**
Limits deformation of the fiber at impact for maximum transmission of power.
- FORGED FIBER**
FORGED FIBER has strong molecular bonds which result in 1.5 times higher heat resistance than general nylon.
- HI-SLING FIBER**
Achieves greater flight with high resilience and provides a soft hitting feel.
- COMPACT FILLED STRUCTURE**
Reduce power loss and improve strength by filling the gaps fully with resin.
- VECTRAN™**
Stretch resistant Super Fiber: more than twice as strong as nylon.
- BRAIDED STRUCTURE**
Braided threads around the main core thread create a robust string structure, allowing it to swiftly return back to its original position after impact for more power and repulsion on the shuttlecock.

COATING

- ELASTICITY OUTER**
The Elasticity Outer is a coating with enhanced flexibility achieved by applying NANOALLOY technology to nylon. The result is a combination of quick repulsion, durability, and control.
- POLYURETHANE COATING**
This tacky coating provides increased hold on the shuttlecock providing more bite on shuttlecock at the moment of impact for improved control.
- SPECIAL NYLON COATING**
Coating combined with highly flexible material at high speed deformation. Bites the shuttle at impact, showing great control and power.
- COMPOUND TITANIUM HYDRIDE**
Compound Titanium Hydride coating provides not only a sharp feel at impact but increased durability.
- CUP-STACK CARBON NANOTUBE**
Advanced construction minimizes notching of the string at the intersections, for greater durability and high repulsion power.

CRAFTING EVERY SWEET SPOT

The Yonex Stringing Team is a global network of over 1,500 world-class stringers who are skilled in crafting the perfect sweet spot to meet every player's demands.

Equipped with state-of-the-art stringing machines that protect the integrity of every frame, these stringers are experts in optimizing every racquet's performance. Each string is pulled and knotted with precision to ensure that players can rely on the consistency required to come out on top.

Ranging from the prestigious BWF World Championships and YONEX All England Open to Super 300 tournaments like the YONEX Swiss Open, the Yonex Stringing Team comes together to provide their deep knowledge of equipment and expert dexterity for players to compete and the highest level of badminton.

STRINGING MACHINES

PRECISION 9.0

Premium electronic tennis, badminton, and soft tennis stringing machine

SIZE	Approx. 1,070mm (W) x 660mm (D) x 1,070mm - 1,370mm (H)
WEIGHT	Approx. 73 kg / 161 lbs
PULL SPEED	9 speeds
TENSION RANGE	10-88 lbs (0.5 increments); 4.4-39.4 kg (0.2 increments + 5)
PRE-STRETCH	1-20% (1% increments)
ITEM CODE	SPR90W

FEATURES

USER-FRIENDLY: STRINGING ENVIRONMENT

A control panel with angle, brightness, and sound adjustments, along with a USB charging port, creates a comfortable stringing environment.

EFFICIENT: MOUNTING SYSTEM

Lower racquet posts and a compact turntable combine to allow for smoother stringing, while improved gripping on the clamps results in less damage to the string.

CUSTOMIZABLE MAIN POST

Easily adjust the height on the main post with one click through the electric elevation system.

PRECISE: AUTOMATIC LOCK FUNCTION

An accurate and quick lock function improves stringing efficiency and speed.

PRECISION 8.0

Electronic tennis, badminton, and soft tennis stringing machine

SIZE	Approx. 1,070mm (W) x 640mm (D) x 1,110-1,360mm (H)
WEIGHT	Approx. 54 kg / 119 lbs
PULL SPEED	9 speeds
TENSION RANGE	10-88 lbs (0.5 increments); 4.4-39.4 kg (0.2 increments + 5)
PRE-STRETCH	1-20 (1% increments)
ITEM CODE	SPR80W

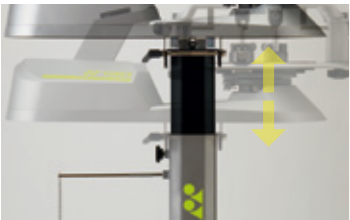

FEATURES

PRECISE: CLAMP
Precision 8.0 features an upgraded clamp, with a thinner, shorter, and more ergonomic design.
The new clamp design prevents clamps from overlapping and allows stringers to clamp closer to the racquet frame when tensioning.

EFFICIENT: CLAMP BASE
Designed with a larger button for easy unlocking, improving stringing speed and efficiency.

ADJUSTMENT: MAIN POST
Height adjustment range: 250mm.
The main post can be manually adjusted to allow for smooth height adjustment.

STABILITY: MACHINE BASE
The stability got improved by the enlarged base to expand the installation area and the low center of gravity.

PRECISION 5.2 NEW

Electronic tennis, badminton, and soft tennis stringing machine

SIZE	Approx. 1,169mm (W) x 685mm (D) x 1,093-1,273mm (H)
WEIGHT	Approx. 74 kg / 163 lbs
PULL SPEED	3 speeds
TENSION RANGE	11-82 lbs (0.5 increments); 5-37 kg (0.2 increments)
PRE-STRETCH	0, 5, 10, 15, 20%
ITEM CODE	SPR52W

FEATURES

CLAMP
Utilizing aluminum for a lightweight design. Improved usability ensures reduced fatigue during extended stringing sessions. Refinements to the interior of the clamp jaws ensure secure gripping, even with high tension or soft string, while minimizing damage. Incorporating an anti-loosening feature prevents the dial from loosening during operation.

CLAMP BASE & RAIL
Smoother movement is achieved through bearing installation, enhancing operability. Improved noise reduction through changes in material combinations.

CONTROL PANEL
Added features include pull count display and volume adjustment functions (9 levels). The button layout and LED display have been updated to achieve advanced design and improved work efficiency.

TENSION UNIT
Redesigned to be usable without a stand (on a tabletop). The tool tray now features improved weight capacity and reduced shaking, enabling the storage of numerous tools.

PRECISION 3.2 NEW

Specialized badminton stringing machine

SIZE	Approx. 1,036mm (W) x 459mm (D) x 1,080-1,280mm (H)
WEIGHT	Approx. 58 kg / 128 lbs
PULL SPEED	3 speeds
TENSION RANGE	11-46 lbs (0.5 increments); 5-21 kg (0.2 increments)
PRE-STRETCH	0, 5, 10, 15%
ITEM CODE	SPR32B

FEATURES

EFFICIENT: TURNTABLE
Rigid stainless-steel arms reduce damage to the racquet frame.
Compact turntable allows for smoother stringing process.

PRECISE: CLAMP
Crafted to securely grip the finest and softest strings, these clamps prevent slippage and enhance workflow efficiency. **Built with increased durability** and a lightweight design, they minimize strain for the stringer throughout the lengthy stringing process.

CLAMP BASE & RAIL
Smoother movement is achieved through bearing installation, enhancing operability.
Improved noise reduction through changes in material combinations.

USER-FRIENDLY: CONTROL PANEL
It offers a wide range of tension settings, with user-friendly button layout and highly visible LED display for improved work efficiency.

SWING WEIGHT MACHINE

PRECISION SCAN

Electronic tennis, badminton, and soft tennis weight and balance machine

SIZE	Approx. 700mm (W) x 453mm (D) x 283mm (H)
WEIGHT	Approx. 15 kg / 33 lbs
ITEM CODE	SPRSC

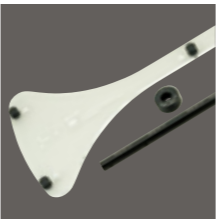

FEATURES

Precisely scan the total weight and balance of racquets by placing the racquet on the machine with a touch of a button.

QUICK SCAN: COMPUTER UNIT
The computer unit will provide the total weight, balance, swing weight, and performance swing weight.
Performance swing weight is a Yonex-exclusive measurement - more accurate than normal swing weight - and is calculated by using the values of the total weight, racquet balance, and swing weight.

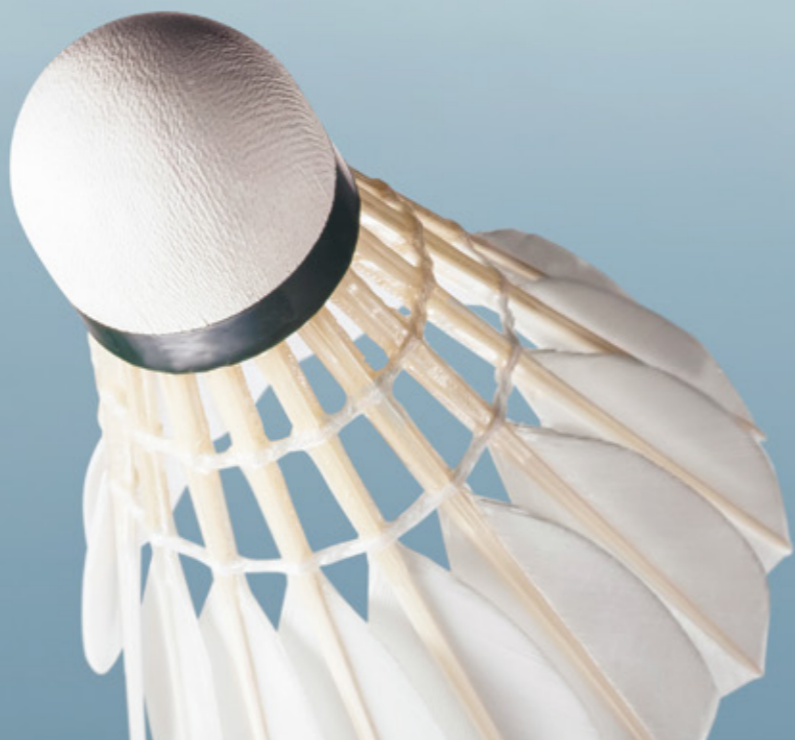

ACCURATE: COVER, BAR, RING
The acrylic cover protects the machine's three main sensors while not in use.
A calibration bar and calibration ring is provided to ensure the machine gives accurate swing weight measurements.

OUR RANGE OF
shuttlecocks

“Precision flight.”

Since 1965, Yonex has manufactured feather shuttlecocks widely known to deliver a consistent stable flight, and class-leading durability. Manufactured with incredible attention to detail, players can trust in a quality shuttle that performs the same every time. Yonex shuttlecocks are seen on the international stage, providing premium flight for some of the highest level tournaments such as the BWF World Championships and Malaysia Open.

FEATHER SHUTTLECOCKS

Yonex has been meticulously hand-crafting the best feather shuttlecocks in the world since 1965. Each of our shuttles is assembled by a team of expert craftsmen using the finest materials. They are then individually tested to make sure they deliver consistent flight trajectory, accuracy and distance at all temperatures. That’s why the best players and the biggest tournaments in the world choose Yonex shuttlecocks.

Temperature Grade:

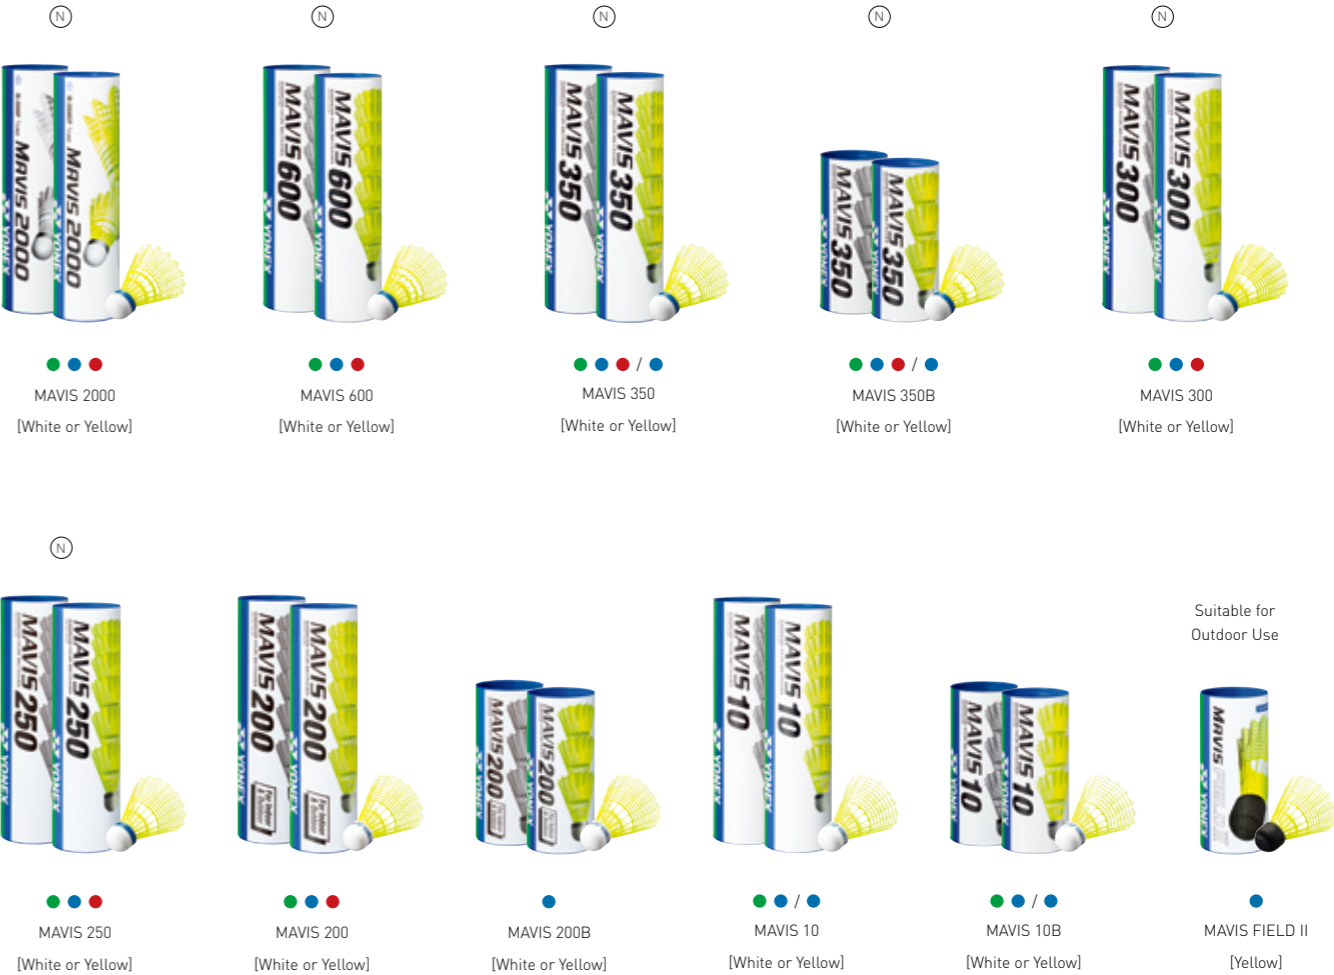

- ① 33°C and above
- ② 27°C - 33°C
- ③ 22°C - 28°C
- ④ 17°C - 23°C
- ⑤ 18°C and below

*Shuttlecock performance can vary by altitude, so please consult with your local retailer or distributor.

NYLON SHUTTLECOCKS

Outdoor or indoor, Yonex precision MAVIS nylon shuttlecocks are the closest you can get to a traditional feather. Designed to have the same flight time as a feather shuttle, they give an accurate and durable performance with a traditional feel.

The hardness of the skirt – the feather part of the nylon shuttlecock – varies depending on temperature.

- Ⓝ Natural Cork
- GREEN CAP
SLOW / 22°C–33°C
- BLUE CAP
MEDIUM / 12°C–23°C
- RED CAP
FAST / 0°C–13°C

CONVENTIONAL

WING RIB™

WING RIB™

The WING RIB design utilizes air flow through the shuttlecock to restore shape quickly on impact. Based on flight dynamics, this original design grants stable flight, contrary to conventional models that restore shape via stiff construction.

The WING RIB design is featured in MAVIS 2000 and MAVIS 600.

OUR RANGE OF shoes

“Agility on court.”

Badminton footwork is unique. The combination of high impact levels with aggressive changes in both direction and pace will require demanding footwear constructs. With the proprietary POWER CUSHION material as the foundation, Yonex badminton footwear will convert the high impact energy into power for the next step. Agility, durability, comfort, or simply an all-around shoe, the Yonex shoe line-up will give you that extra kick you are looking for in your footwork.

KUNLAVUT VITIDSARN (THAILAND)

ALL AROUND

The perfect combination of cushioning, stability and lightness.

SEAMLESS UPPER

By utilizing a single piece of synthetic leather upper across the toe and mid areas, the fit is enhanced and unwanted strain is alleviated.

INNER BOOTIE

A flexible material from the metatarsal to the heel that produces a more gentle fit.

ERGONOMIC SHAPED OUTSOLE

By optimizing the rise of the outsole rubber, flexibility is improved and integrated with foot when bending. Integration with the foot enhances dash power and supports quick footwork.

ALL AROUND

The perfect combination of cushioning, stability and lightness.

POWER CUSHION

65 Z NEW

Seamless upper and Inner bootie for classic fit and efficient footwork with enhanced foot shoe integration.

LIGHTWEIGHT

Our lightest shoe ever. Get to the shuttle quicker in this lightweight-but-durable shoe.

msLITE X

msLITE X is Yonex's lightest midsole material and is one of the key technologies in making the AERUS Z lighter while providing smooth, fluid footwork.

SEAMLESS UPPER

The seamless upper design is reinforced with wear resistance material and film in each area to achieve lightweight, high breathability and support. It maintains comfort even if you play for long time.

My next horizon is...
to become iconic at net play and master my field.

My next horizon is...
competing in the Olympics and earning a higher podium finish. I'm proud of the effort I put into practice, even if I only realize it afterward.

STABILITY

Give your footwork the confidence that comes with stability.

RADIAL BLADE SOLE
Designed for confidence in directional change. A new sole pattern increasing traction in vertical, horizontal and diagonal movements.

SEMI ONE-PIECE SOLE
Toe and heel rubber soles combined into a singular piece for improved stability, and for more traction through additional surface area.

LATERAL SHELL AND STABILITY REINFORCEMENT

To reduce lateral shake and improve stability, the hardened shell like portion, LATERAL SHELL, is applied to support the most burdened part and reinforced parts on the outer midfoot to the heel.

POWER CUSHION ECLIPSION Z

Stability for quick turnaround and comfort for agile footwork.

APPAREL TECHNOLOGY

VERYCOOL DRY
KEEP COOL, DRY AND ON TOP OF YOUR GAME
A special hydrophobic fiber moves moisture from the skin to the fabric's surface. Along with its quick drying property, VERYCOOL DRY keeps you cool and dry at all times.

VERYCOOL
A COOL WAY TO BEAT THE HEAT
By using cooling material Xylitol, VERYCOOL clothing from Yonex absorbs heat and perspiration, providing a significant cooling effect during exercise. No matter what the ambient temperature, VERYCOOL lowers body heat by 3°C for cooler play*.
*Data from Unitika Garments Technology & Research Laboratories Ltd.

PRECISION MOVE
EASY TO MOVE
Yonex special cutting provides to maximize your performance, reduce stress on arm swing, quick and smooth step.

AIR RELEASE
SUPERIOR COMFORT IN THE HEAT
As warm air rises, cold air enters into open areas. Based on this fact, new Yonex Air Release technology has greatly improved ventilation in our shirts. Mesh in the back of the neck provides high ventilation, pushing out body heat. Meanwhile, fresh air is taken in through mesh equipped on the side of the shirt from the bottom to the armpits, keeping you cool under severe heat.

UV REDUCTION
OUTSTANDING ULTRAVIOLET INTERCEPTION
Yonex clothing intercepts infrared radiation and approximately 92%* of ultraviolet, minimizing heat build-up during play.
*Tested by BOKEN QUALITY EVALUATION INSTITUTE.

SWEAT ABSORBENT AND QUICK DRYING
STAY DRY AND LIGHT
Fabric that wicks away moisture and keeps you dry.

STRETCH
FLEXIBLE, FORGIVING AND FASHIONABLE
Innovative stretch material allows for free movement that supports your active play.

ANTISTATIC
AVOID THE DISCOMFORT OF STATIC ELECTRICITY
Carbon impregnated conductive fibers are woven into the clothing to remove static electricity build-up.

ANTIBACTERIAL AND DEODORANT
PROTECT AGAINST BACTERIA
Protects against bacteria and reduces unpleasant odours.

POLYGIENE
STAY FRESH AND ODOR-FREE
Woven into the fabric, this odor control tech keeps you fresh and odor-free even after intense play.

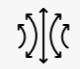

3D ERGO
SUPPORT YOUR ONE STEP FORWARD
Designed to relieve pressure on the toes and support their stepping force. It wraps the entire foot with moderate pressure, eliminating sock loosening in shoe.

SUSTAINABILITY
CRAFT A BETTER FUTURE WITH UNIQUE INNOVATIONS
An an industry leader, we use our unique innovations to create new sustainable solutions for the environment and our customers around the world.

OUR RANGE OF
accessories

“Prepare for performance.”

The connection between your hand and the racquet is often overlooked but can make the biggest difference. Yonex designs a range of overgrips to fit every player’s preference. From Wet Super Grap - Yonex’s most popular over-grip that has been sold enough to wrap around the world five times - to Dry Super Grap, which wicks away moisture and provides a dry feeling even in humid conditions, every Yonex overgrip is designed to make the connection between your hand and your racquet one you can trust.

ACCESSORIES / OVERGRIPS

WET SUPER GRAP

Tacky feel

Since its launch in 1987, the Wet Super Grap has become Yonex’s best-selling overgrip, having sold enough grips to wrap five times around the earth.

ACCESSORIES / SUPPORTS

MUSCLE POWER SUPPORTERS

Yonex's MUSCLE POWER SUPPORTER equipment integrates silicon to comfortably secure each joint and muscle. The combination of tape and silicon embraces your joints while moderately compressing muscle fiber and gently supporting ligaments against rapid movement.

ACHILLES TENDON
Firmly wraps and protects achilles tendon

COLOR	BLACK
LENGTH	S: 19 - 20cm M: 21 - 22cm L: 23 - 24cm
MATERIAL	Chloroprene, Silicon, Nylon
ITEM CODE	MPS-30AC

WRIST
Controls hyper-extension of ligaments

COLOR	BLACK
LENGTH	M: 13 - 16cm L: 17 - 20cm
RIGHT SIDE	M / R - M, L / R - L
LEFT SIDE	M / L - M, L / L - L
MATERIAL	Chloroprene, Silicon, Nylon
ITEM CODE	MPS-60RI

ANKLE
Firmly holds the ankle in place and protects ligaments from rapid movements

COLOR	BLACK
LENGTH	S: 19 - 20cm M: 21 - 22cm L: 23 - 24cm LL: 25 - 26cm
RIGHT SIDE	S / R - S, M / R - M, L / R - L, LL / R - LL
LEFT SIDE	S / L - S, M / L - M, L / L - L, LL / L - LL
MATERIAL	Chloroprene, Silicon, Nylon
ITEM CODE	MPS-40AK

ELBOW
Moderately compresses tendons to cushion impact on elbows

COLOR	BLACK
LENGTH	S: 20 - 23cm M: 24 - 27cm L: 28 - 30cm
MATERIAL	Chloroprene, Silicon, Nylon
ITEM CODE	MPS-70EL

KNEE
Applies pressure on patella and supports knees. Easy to slip on / off with adjustable compression, with a mesh structure for ultimate comfort

COLOR	BLACK
LENGTH	S: 29 - 32cm M: 33 - 36cm L: 37 - 40cm
MATERIAL	Chloroprene, Silicon, Nylon
ITEM CODE	MPS-80SK

COMPRESSION LEG SUPPORTER

COLOR	BLACK
SIZE	Ankle Circumference: S: 16 - 22cm M: 19 - 25cm L: 21 - 28cm Calf Circumference: S: 28 - 38cm M: 32 - 42cm L: 36 - 46cm
MATERIAL	Nylon, Polyurethane
ITEM CODE	STB-AC03

MUSCLE POWER SUPPORTER products are designed for sports application and not intended to provide support or benefit for daily use.

“TOGETHER,
WE HAVE
THIS UNIQUE
OPPORTUNITY
TO PROMOTE
BADMINTON GLOBALLY
WITH THE AIM OF MAKING
IT EVEN MORE POPULAR”

LEE CHONG WEI (MALAYSIA)

10
The
Legends'
Vision YONEX

The Legends' Vision is an initiative founded by four of badminton's most iconic players: **Lee Chong Wei, Lin Dan, Peter Gade, and Taufik Hidayat**. Driven by their shared passion for the sport and a desire to give back, they came together to support the future of badminton. Now joined by **Lee Yong Dae, Carolina Marin, and Saina Nehwal**, they continue their mission to elevate badminton on the global stage.

The movement is centered around four key ambitions: **Junior Development, Community Enrichment, Badminton Discovery, and Sports Advancement**. It aims to inspire the next generation and foster a deeper connection to badminton in people's lives.

Since its launch in 2015, The Legends' Vision has grown steadily and will mark its 10th anniversary in 2025. Through events that bring the excitement of badminton to life, it has connected with fans around the world and continues to build a legacy that encourages more people to discover and enjoy the sport.

To learn more about this initiative, visit Legends.Yonex.com.

	UPPER:	
<p>3D Power Graphite Sheet Provides stability under the center of the foot and reduces shoe twist.</p> <p>Power Graphite Drive A graphite sheet is inserted along the sole for increased stability and to propel you forward to the next shot.</p> <p>Power Graphite Lite Improved stability and reduced twist on landing.</p> <p>Power Graphite Sheet Inserted in the midsole, the lightweight graphite sheet provides improved stability.</p>	<p>Durable Skin Improves shape retention, durability and heat-resistance.</p> <p>Durable Skin Light A seamless construction offers natural comfort with an improved fit, eliminating discomfort from material friction.</p> <p>Double Raschel Mesh Highly breathable mesh for maximum ventilation.</p> <p>Lateral Shell Prevents foot movement at the edge of the sole for reduced power loss, allowing for fluid and aggressive footwork.</p>	<p>Ergoshape The center of gravity is shifted to the large toe – for a comfortable fit and more speed.</p> <p>Toe Assist Shape Reduces pressure on the big toe while improving support at the mid-foot and heel for increased stability. Power loss is reduced for swift footwork.</p> <p>Flexion Upper Asymmetrical design with a curved eyelet creates a natural snug fit around the inner arch. Stress gets absorbed through the toes and instep for a more comfortable fit.</p> <p>Inner Bootie A flexible material from the metatarsal to the heel that produces a more gentle fit.</p>

SOLE:	MIDSOLE:
<p>Hexagrip Lightweight sole material that provides greater grip for agile stable footwork.</p> <p>POWER CUSHION* By improving shock absorption, our POWER CUSHION* technology is designed for faster footwork that transforms impact into energy.</p> <p>POWER CUSHION A lightweight, impact-absorbing material developed independently by Yonex which quickly returns to its original shape after receiving a shock load, converting the shock energy into power for fast and light footwork.</p> <p>Round Sole For quick and smooth footwork ensuring maximum energy transfer into the next shot.</p> <p>Radial Blade Sole Designed for confidence in directional change. A proprietary sole pattern increasing traction in vertical, horizontal and diagonal movements.</p> <p>Semi One-Piece Sole Toe and heel rubber soles combined into a singular piece for improved stability, and for more traction through additional surface area.</p>	<p>ToughBrid Light Provides cushioning, shape retention and high elasticity whilst reducing shoe weight.</p> <p>Feather Bounce Foam A lightweight cushioning material designed to provide an added bounce with each step.</p> <p>msLITE X The lightest midsole material in Yonex history, 30% lighter* than general EVA.</p> <p>*Tested by Yonex</p> <p>Hyper msLITE Lightweight midsole that still maintains it shape.</p> <p>INSOLE:</p> <p>Synchro-Fit Insole Reduces the gap between the foot and shoe with extra support around the heel, for maximum grip, comfort and performance.</p>
