Years from now, this racquet will be lighter and stronger than you could ever picture. Fully packed with new innovations. All those innovations are bound to be discovered. They’re all hidden, impatiently waiting to be uncovered.

When I get my hands on this racquet, it will be the culmination of thousands of ideas, tried and failed. It will be standing proof, that endlessly testing both expected and unexpected ideas will mold the basis for game-changing performance.

But this racquet won’t uncover itself — not without a little imagination.

It’s time I search beyond what I knew today.

96 RUNNING SHOES
102 APPAREL
126 BAGS
138 ACCESSORIES
Badminton racquets were the start of the Yonex journey into sports. With each racquet developed, our vision became clearer. We learned the fun of crafting world-class racquets alongside the most elite players and now, we strive for innovative racquets that help every athlete achieve new speeds and new heights.

We believe the best performance cannot be prepared with just any ingredient. Every gram, every millimeter can be the deal-maker or -breaker. That’s why we source the highest quality advanced graphite for our chefs to personally cook up into each individual masterpiece.
ISOMETRIC™ technology was invented by Yonex to maximize the vital sweet spot area and is now a world-leading feature of our racquets. The square shaped head of the racquet means that there are more strings crossing at right angles, resulting in a bigger sweet spot. Yonex continues to develop and enhance ISOMETRIC™ power, reducing still further the ‘inert’ space around the edge of conventional racquets, creating a far bigger sweet spot than other frames.

ISOMETRIC™ is a trademark of Yonex Co., Ltd. *Tested by Yonex
*Originally developed for tennis racquets, in 1992 Yonex released the first ISOMETRIC badminton racquet.
The ASTROX series is developed to meet the demands of aggressive attacking play, taking the point to your opponent with relentless steep attacks.

The Rotational Generator System perfectly distributes weight through the grip end, frame top and the T-joint for maximum control, enabling smooth transition between shots, in a rapid succession. Revolutionary graphite materials such as Namd™ are utilized to create faster snapback for imposing power.

* Namd™ technology developed by Nitta Corporation & Trademark © Nitta Corporation. disperses carbon nanotubes into carbon fiber composite.
The added weight distribution on the sides of the frame enhances stability during the swing, resulting in maximized smash power. And allowing for the effective breakdown of defenses during back-court attacks.

By applying the counterbalance theory, weight is carefully distributed throughout the grip end, frame top and joint, enabling smooth transition between powerful shots for rapid, successive attacks. The innovative graphite “2G-Namd™ Flex Force” used in the shaft, characterized by its quick flex and snapback, maximizes shot power and advances the performance of the Rotational Generator System.

ATHLETE:  
VIKTOR AXELSEN

HOW OLD WERE YOU WHEN YOU STARTED PLAYING BADMINTON?

“When I was 6 years old. My father introduced me to the game!”

HOW DID YOU FEEL WHEN YOU STARTED PLAYING BADMINTON?

“I felt amazing playing badminton. I loved being alone on court and being responsible for my own wins and losses.”

WHAT DO YOU LIKE ABOUT BADMINTON NOW?

“I love seeing how far I have come and I try my best to reach my fullest potential. It’s a wonderful journey and I learn something new about myself all the time!”

WHAT IS YOUR BIGGEST GOAL RIGHT NOW?

“My biggest goal is winning another Olympic Gold medal in the 2024 Olympics. I’m trying my best to stay healthy and be in shape!”

FAJAR ALFIAN (INA)
RIAN ARDIANTO (INA)
The acclaimed ARCSABER series designed for control is reimagined with emphasized shuttle-pocketing for a controlled offense and one-of-a-kind feel at impact.

Taking control of the court can come in all different forms. For the ARCSABER, that comes from the extra few milliseconds of shuttle contact time allowing assertive shot-making. Combine that with the stability of the enhanced ARCSABER frame, and you gain the confidence to command the court.
The frame is lined with POCKETING BOOSTER, a proprietary rubber-like material emphasizing elasticity in the frame’s flex.

Master control with confidence using this unique frame structure that offers varying levels of flex from the top, sides, to the bottom. Designed to enhance shuttle hold while minimizing instability and twisting upon impact.

The CONTROL-ASSIST BUMPER attached at the top contains T-ANCHOR, micro-sized tetrapods that help lock in vertical strings for improved accuracy.

Engineered to improve swing speed and maneuverability, the NANOFLARE is the only head-light racquet proven to provide unrivaled power and increased shuttle acceleration.

The difference is in the technology – built for speed, the NANOFLARE, is constructed with the SONIC FLARE SYSTEM which strategically lines high modulus graphite material at the top and bottom of the frame for amplified repulsion performance.
The wide frame profile minimizes warping during the swing, improving repulsion and racquet surface stability for sharp, powerful shots.

Shuttle repulsion maximized. Strategically irving high-modulus graphite at the top and bottom is proven to produce high initial speeds.

The steep angle from the stringing area to the T-joint and the use of copper at the bottom of the frame, increases rigidity and enhances repulsion, enabling powerful drives that take the opponent by surprise.

String density increases by adding an extra cross string, boosting surface pressure and creating enhanced repulsion for accelerated drives.

---

The mesh cover assists shot development by adding air resistance to your swing. This improves strength and gives you the ability to deliver more powerful shots.

### ATHLETE: SATWIKSAIRAZ RANKIREDDY

**HOW OLD WERE YOU WHEN YOU STARTED PLAYING BADMINTON?**

“I was 7 years old.”

**HOW DID YOU FEEL WHEN YOU STARTED PLAYING BADMINTON?**

“I started as a kid as a physical activity and it later became a professional thing for me. As a kid, what I enjoyed was to be with friends and play.”

**WHAT DO YOU LIKE ABOUT BADMINTON NOW?**

“I just love playing badminton, there are no words to describe it.”

**WHAT IS YOUR BIGGEST GOAL RIGHT NOW?**

“To be on the Podium at the Paris Olympics.”

---

### ATHLETE: CHIRAG SHETTY

**HOW OLD WERE YOU WHEN YOU STARTED PLAYING BADMINTON?**

“I started playing badminton at the age of 7.”

**HOW DID YOU FEEL WHEN YOU STARTED PLAYING BADMINTON?**

“I genuinely loved playing the sport as it gave me the opportunity to express myself in the best way possible.”

**WHAT DO YOU LIKE ABOUT BADMINTON NOW?**

“The best thing about badminton is that it is one of the fastest sports in the world and hence really fun to watch.”

**WHAT IS YOUR BIGGEST GOAL RIGHT NOW?**

“My biggest goal right now is to hopefully come back with a medal from the Olympic Games in Paris.”

**RACQUETS | TECHNOLOGY**

**SHAPING**

**JOINT**
- BUILT-IN T-JOINT
- NEW BUILT-IN T-JOINT

**FLEX FOR**
- The shock absorbing resin used in the joint creates a comfortable hitting feel.

**HORIZONTAL A CONCEPT**
- Frame dedicated to drives.
- Expanded sweet spot for control.
- Designed to slice through the air, generating speedy power.
- The added weight distribution on the sides of the frame limits deformation, generating a higher initial launch speed.
- Stringing pattern for enhanced repulsion.
- The extra stiff profile provides a solid stable feel on impact.
- Reduced air resistance and improved feel with the shuttle.
- The front allows the shaft to flex, while the sides arch-engineered, improving shock absorption.
- The added rubber creates a lighter feel and increased flex for greater head speed.
- The lightweight T-Joint increases stability of the shuttle on impact.
- Unique shaped cap which maximizes shaft performance. The front allows the shaft to flex, while the sides arch-shaped curve stabilizes the racquet face by preventing the frame from twisting.

**HORIZONTAL ASSIST BUMPER**
- The connected grommet at the bottom of the frame amplifies the shuttle repulsion. The high-strength rubber material mixed into the bumper reduces the frame and frame deformation, generating a higher initial launch speed.
- Stabilizes the racquet head during impact, with larger grommets designed for more string movement, extending the shuttle contact time.

**MUSCLE POWER FRAME**
- Ultra-elastic materials produce sharper power for all shots.
- Solid feel and power.
- The extra stiff profile provides a solid stable feel on impact.
- Reduced air resistance and improved feel with the shuttle.
- The front allows the shaft to flex, while the sides arch-engineered, improving shock absorption.
- The added rubber creates a lighter feel and increased flex for greater head speed.
- The lightweight T-Joint increases stability of the shuttle on impact.
- Unique shaped cap which maximizes shaft performance. The front allows the shaft to flex, while the sides arch-shaped curve stabilizes the racquet face by preventing the frame from twisting.

**NANOSCIENCE**
- High-performance elastic threads in the strings, maximizing power and control.
- Increased shot power.
- Provides a better balance point for improved comfort.

**NEW BUILT-IN T-JOINT**
- Increases shot power.
- Provides a better balance point for improved comfort.

**POWER ASSIST BUMPER**
- Designed to slice through the air, generating speedy power.
- The lightweight T-Joint increases stability of the shuttle as the strings, maximizing power and control.

**RAUCQUETS | TECHNOLOGY**

**GREAT POWER FOR ALL SHOTS.**
- Ultra-elastic materials produce sharper power for all shots.
- The extra stiff profile provides a solid stable feel on impact.
- Reduced air resistance and improved feel with the shuttle.
- The front allows the shaft to flex, while the sides arch-engineered, improving shock absorption.
- The added rubber creates a lighter feel and increased flex for greater head speed.
- The lightweight T-Joint increases stability of the shuttle on impact.

**SPEED ASSIST BUMPER**
- The connected grommet at the bottom of the frame amplifies the shuttle repulsion. The high-strength rubber material mixed into the bumper reduces the frame and frame deformation, generating a higher initial launch speed.
- Stabilizes the racquet head during impact, with larger grommets designed for more string movement, extending the shuttle contact time.

**SLIM SHAFTS**
- Ultra-elastic materials produce sharper power for all shots.
- Solid feel and power.
- The extra stiff profile provides a solid stable feel on impact.
- Reduced air resistance and improved feel with the shuttle.
- The front allows the shaft to flex, while the sides arch-engineered, improving shock absorption.
- The added rubber creates a lighter feel and increased flex for greater head speed.
- The lightweight T-Joint increases stability of the shuttle on impact.
- Unique shaped cap which maximizes shaft performance. The front allows the shaft to flex, while the sides arch-shaped curve stabilizes the racquet face by preventing the frame from twisting.

**STRENGTH FLEX AND POWER**
- The extra stiff profile provides a solid stable feel on impact.
- Reduced air resistance and improved feel with the shuttle.
- The front allows the shaft to flex, while the sides arch-engineered, improving shock absorption.
- The added rubber creates a lighter feel and increased flex for greater head speed.
- The lightweight T-Joint increases stability of the shuttle on impact.
- Unique shaped cap which maximizes shaft performance. The front allows the shaft to flex, while the sides arch-shaped curve stabilizes the racquet face by preventing the frame from twisting.

**T-ANCHOR**
- Increases stiffness for quicker racquet recovery into the next shot.

**TUNGSTEN**
- A metal with a high tensile strength.
- Increases stiffness for quicker racquet recovery into the next shot.

**VDM HYBRID DAMPING MESH**
- Increases shot power.
- Provides a better balance point for improved comfort.
YONEX SPONSORED EVENTS 2024

Yonex is the official stringing partner, shuttlecock and equipment supplier at the following events throughout 2024:

JANUARY
1. Malaysia Open (Super 1000)
2. YONEX SUNRISE India Open (Super 750)
3. Indonesia Masters (Super 500)
4. Thailand Masters (Super 300)

FEBRUARY
5. YONEX German Open (Super 300)

MARCH
6. YONEX French Open (Super 750)
7. YONEX All England Open Badminton Championships (Super 1000)
8. YONEX Swiss Open (Super 300)

MAY
9. Thailand Open (Super 500)
10. Malaysia Masters (Super 500)

JUNE
11. Indonesia Open (Super 1000)
12. YONEX US Open* (Super 300)

JULY
13. Canada Open (Super 500)

AUGUST
14. Japan Open (Super 750)

SEPTEMBER
15. YONEX Taipei Open (Super 300)

OCTOBER
16. Arctic Open (Super 500)

NOVEMBER
17. Kumamoto Masters Japan (Super 500)
18. Syed Modi India International (Super 300)

As of October 2023. * Venue undecided
Choosing the right string is as important as choosing the right racquet. That is why Yonex engineers put so much effort into designing innovative new products like the EXBOLT, a next-generation multifilament string. The EXBOLT is engineered with the proprietary FORGED FIBER, a thin yet radically durable outer, allowing the player to pierce through their opponent’s defense with agile and high-velocity drives.

Innovation lies in the smallest details. Yonex never stops meticulously testing cutting-edge fibers and coatings, finding more efficient ways to craft stronger strings for every performance preference and level of play.
Crafted for high velocity drives.

Innovated for more hold on the shuttle, allowing for precise attacks.

Constructed to last longer for hard-hitting players.
Yonex employs a proprietary material characterized by high intermolecular bonding strength, capable of withstanding heat 1.5 times greater than ordinary nylon.

**Technologies**

- ROLL FORGED FIBER: Limits deformation of the fiber at impact for maximum transmission of power.
- HI-SLING FIBER: Achieves greater flight with high resilience and provides a soft hitting feel.
- COMPACT FILLED STRUCTURE: Reduce power loss and improve strength by filling the gaps fully with resin.
- VECTRAN™: Stretch resistant Super Fiber: more than twice as strong as string nylon.
- BRAIDED STRUCTURE: Braided threads around the main core thread creates a robust string structure, allowing it to swiftly return back to its original position after impact for more power and repulsion on the shuttlecock.
- ELASTICITY OUTER: The Elasticity Outer is a coating with enhanced flexibility achieved by applying NANOALLOY technology to nylon. The result is a combination of quick repulsion, durability, and control.
- POLYURETHANE COATING: This tacky coating provides increased hold on the shuttlecock providing more bite on shuttlecock at the moment of impact for improved control.
- SPECIAL NYLON COATING: Coating combined with highly flexible material at high speed deformation. Bites the shuttle at impact, showing great control and power.
- COMPOUND TITANIUM HYDRI: Compound titanium hydride coating provides not only a sharp feel at impact but increased durability.
**Crafting Every Sweet Spot**

The Yonex Stringing Team is a global network of over 1,500 world-class stringers who are skilled in crafting the perfect sweet spot to meet every player’s demands.

Equipped with state-of-the-art stringing machines that protect the integrity of every frame, these stringers are experts in optimizing every racquet’s performance. Each string is pulled and knotted with precision to ensure that players can rely on the consistency required to come out on top. The Yonex Stringing Team comes together to the tournament to provide their deep knowledge of equipment and expert dexterity for players to compete and the highest level of badminton.

In addition to BWF tournaments like BWF World Championships and YONEX All England Open, Yonex will provide the stringing machine and stringing service for Olympic and Paralympic Games Paris 2024 Badminton Competition.

**Made in Japan**

**Features**

**User-Friendly: Stringing Environment**

A control panel with angle, brightness, and sound adjustments, along with a USB charging port, creates a comfortable stringing environment.

**Customizable Main Post**

Easily adjust the height on the main post with one click through the electric elevation system.

**Efficient: Mounting System**

Lower racquet posts and a compact turntable combine to allow for smoother stringing, while improved gripping on the clamps results in less damage to the string.

**Precise: Automatic Lock Function**

An accurate and quick lock function improves stringing efficiency and speed.
**PRECISION 8.0**

Electronic tennis, badminton, and soft tennis stringing machine

**SIZE**

*Made in Japan*

---

**FEATURES**

**PRECISE: CLAMP**
Precision 8.0 features an upgraded clamp, with a thinner, shorter, and more ergonomic design.
The new clamp design prevents clamps from overlapping and allows stringers to clamp closer to the racquet frame when tensioning.

**EFFICIENT: CLAMP BASE**
Designed with a larger button for easy unlocking, improving stringing speed and efficiency.

**ADJUSTMENT: MAIN POST**
Height adjustment range: 250mm.
The main post can be manually adjusted to allow for smooth height adjustment.

**STABILITY: MACHINE BASE**
The stability got improved by the enlarged base to expand the installation area and the low center of gravity.

---

**PRECISION 5.0**

Electronic tennis, badminton, and soft tennis stringing machine

**SIZE**
Approx. 1,167mm (W) x 685mm (D) x 1,064-1,242mm (H)

**WEIGHT**
Approx. 75 kg / 165 lbs

**PULL SPEED**
3 speeds

**TENSION RANGE**
11-82 lbs (0.5 increments); 5-37 kg (0.2 increments)

**PRE-STRETCH**
0, 5, 10, 15, 20%

**ITEM CODE**
SPR50W

---

**FEATURES**

**EFFICIENT: RACQUET FRAME SUPPORTS**
The frame supports are easily adjustable with a one-click sliding functionality and head-size guides.

**USER-FRIENDLY: CONTROL PANEL**
Optimized for efficiency, the control panel is designed with large buttons for easy accessibility and improves accuracy. It features a USB port on the side for convenient charging.

**PRECISE: DISC BRAKE SYSTEM**
A first for stringing machines, the PRECISION 5.0 turntable features a braking system utilized in cars and aircraft that enables quick reactions for improved accuracy.

**ORGANIZED: TOOL TRAYS**
Keep your tools organized with two tool trays - one tucks away below the control panel, and the second is located on the side of the machine.
**STRINGING MACHINES**

**PRECISION 3.0**
Specialized badminton stringing machine

**FEATURES**

**EFFICIENT: TURNTABLE**
Rigid stainless-steel arms reduce damage to the racquet frame. Compact turntable allows for smoother stringing process.

**PRECISE: CLAMP**
Crafted to grip the finest and softest strings, these clamps prevent loosening, creating efficient workflow. Their lightweight design minimizes fatigue during the long stringing process.

**USER-FRIENDLY: CONTROL PANEL**
It offers a wide range of tension settings, with user-friendly button layout and highly visible LED display for improved work efficiency.

**ORGANIZED: TOOL TRAY**
A wide tool tray stowed underneath to create a well-organized workspace.

**FEATURES**

Precisely scan the total weight and balance of racquets by placing the racquet on the machine with a touch of a button.

**QUICK SCAN: COMPUTER UNIT**
The computer unit will provide the total weight, balance, swing weight, and performance swing weight. Performance swing weight is a Yonex-exclusive measurement - more accurate than normal swing weight - and is calculated by using the values of the total weight, racquet balance, and swing weight.

**ACCURATE: COVER, BAR, RING**
The acrylic cover protects the machine’s three main sensors while not in use. A calibration bar and calibration ring is provided to ensure the machine gives accurate swing weight measurements.
Since 1965, Yonex has manufactured feather shuttlecocks widely known to deliver a consistent stable flight, and class leading durability. Manufactured with incredible attention to detail, players can trust in a quality shuttle that performs the same every time.

In addition to BWF Major events and other leading tournaments, Yonex will provide shuttlecocks for Olympic and Paralympic Games Paris 2024 Badminton Competition.
Yonex has been meticulously hand-crafting the best feather shuttlecocks in the world since 1965. Each of our shuttles is assembled by a team of expert craftsmen using the finest materials. They are then individually tested to make sure they deliver consistent flight trajectory, accuracy and distance at all temperatures. That’s why the best players and the biggest tournaments in the world choose Yonex shuttlecocks.

*Shuttlecock performance can vary by altitude, so please consult with your local retailer or distributor.

**Temperature Grade:**
- 5°C and above
- 37°C - 33°C
- 27°C - 30°C
- 22°C - 28°C
- 18°C and below

Outdoor or indoor, Yonex precision MAVIS nylon shuttlecocks are the closest you can get to a traditional feather. Designed to have the same flight time as a feather shuttle, they give an accurate and durable performance with a traditional feel.

**WING RIB™**
The WING RIB design utilizes air flow through the shuttlecock to restore shape quickly on impact. Based on flight dynamics, this original design grants stable flight, contrary to conventional models that restore shape via stiff construction.

**The hardness of the skirt – the feather part of the nylon shuttlecock – varies depending on temperature.**

Badminton footwork is unique. The combination of high impact levels with aggressive changes in both direction and pace will require demanding footwear constructs. With the proprietary POWER CUSHION material as the foundation, Yonex badminton footwear will convert the high impact energy into power for the next step. Agility, durability, comfort, or simply an all-around shoe, the Yonex shoe line-up will give you that extra kick you are looking for in your footwork.
A raw egg can be dropped from 12 meters above the POWER CUSHION+ mat, rebounding to a height of 6 meters without breaking.**

*Research by the Japan Vehicle Inspection Association & Boken Quality Evaluation Institute (based on JIS standards) in comparison to conventional cushioning material (EVA).

**Tested by Yonex
**CUSHIONING**

The POWER CUSHION COMFORT series is characterized by its high cushioning performance and propulsion.

- **POWER CUSHION+**
  - Features: POWER CUSHION+ in the middle and in the heel, resulting in reduced stress on the knees and ankles.

- **3D POWER GRAPHITE DRIVE**
  - Yonex’s proprietary graphite sheet is built to flex and generate power with each step, while providing stability from unwanted twist.

- **FEATHER BOUNCE FOAM**
  - A lightweight, high repulsion material built to support agile, fast-paced footwork. 8% lighter in weight, while generating 20% more repulsion than the previous model. *Tested by Yonex*

**POWER CUSHION COMFORT Z**

Provides cushioning plus performance, so you can play your best game longer.

**COLOR:**
- Dark Red (Men), Black / Mint (Women)

**ITEM CODE**
- SHBCFZ3M
- SHBCFZ3L

**STABILITY**

Give your footwork the confidence that comes with stability.

- **RADIAL BLADE SOLE**
  - Designed for confidence in directional change. A new sole pattern increasing traction in vertical, horizontal and diagonal movements.

- **SEMI ONE-PIECE SOLE**
  - Toe and heel rubber soles combined into a singular piece for improved stability, and for more traction through additional surface area.

- **LATERAL SHELL AND STABILITY REINFORCEMENT**
  - To reduce lateral shake and improve stability, the hardened shell like portion, LATERAL SHELL, is applied to support the most burdened part and reinforced parts on the outer-midfoot to the heel.

**POWER CUSHION ECLIPSION Z**

Stability for quick turnaround and comfort for agile footwork.

ATHLETE:
AN SE YOUNG

HOW OLD WERE YOU WHEN YOU STARTED PLAYING BADMINTON?

“When I was in the first grade, I naturally started playing badminton following my parents who enjoyed daily sports.”

HOW DID YOU FEEL WHEN YOU STARTED PLAYING BADMINTON?

“It was big fun and thrilling for me to hit the shuttlecock as the rally goes.”

WHAT DO YOU LIKE ABOUT BADMINTON NOW?

“Badminton is my favorite sport. Badminton is said to be the fastest ball game, but I feel proud and thrilled when receiving those difficult and fast balls.”

WHAT IS YOUR BIGGEST GOAL RIGHT NOW?

“My goal is to win a gold medal in every competition. But it is also my goal that I enjoy playing badminton, which is the sport I love.”

---

LIGHTWEIGHT

Our lightest shoe ever. Get to the shuttle quicker in this lightweight but durable shoe.

msLITE X
msLITE X is Yonex’s lightest midsole material and is one of the key technologies in making the AERUS Z lighter while providing smooth, fluid footwork.

SEAMLESS UPPER
The seamless upper design is reinforced with wear resistance material and film in each area to achieve lightweight, high breathability and support. It maintains comfort even if you play for long time.

Beyond What I See
**POWER CUSHION AERUS Z**

Yonex’s lightest shoe at 210g * for faster footwork with power and cushioning

*Men’s size 26.0cm

CHEN YU FEI (CHN)
OUR RANGE OF —

RUNNING SHOES

“COMFORT AND SPEED.”

If you’re an athlete, you may not be a runner but chances are, you run. Yonex running shoes are designed to help non-runners train in good form while preventing injuries. With our expertise in graphite applied to running shoes, every step, whether from heel-to-toe or midfoot-to-toe, will comfortably propel you forward for more efficient, effective and safe training.
**CARBON CRUISE AERUS**

For serious runners seeking lightweight design and speed.

**3D POWER CARBON**
A full-length carbon structure optimized for speed running.

**WAVE SHOELACE**
An intricate wave-like design that keeps the shoelaces securely fastened.

**CARBON CRUISE AERUS MEN**

**COLOR**
MANGO, ICE GRAY, BLUEBERRY

**WEIGHT**
26.0 cm: 220g / 7.7 oz

**ITEM CODE**
SHRA2M

**CARBON CRUISE AERUS WOMEN**

**COLOR**
PEACH, ICE GRAY

**WEIGHT**
23.5 cm: 192g / 6.8 oz

**ITEM CODE**
SHRA2L

---

**SAFERUN 100X**

For serious runners looking for excellent cushioning and repulsion.

**POWER CUSHION**
The addition of power cushion between the insole and midsole provides high propulsive force.

**ENDURANCE RUBBER**
Highly durable “Endurance Rubber” is placed on the heel of the outsole.

**SAFERUN 100X MEN**

**COLOR**
CITRUS YELLOW, WHITE, EMERALD, BLACK / ACID YELLOW

**WEIGHT**

SPECIFICATIONS / RUNNING SHOES

* BOA® and the BOA® logo are registered trademarks of BOA Technology.
We are driven by the passion for higher on-court performance.
From head, to toe.
Racquets, to apparel, to footwear.

Every inch counts.
Every gram makes a difference.
Every thread matters.

Each of the instruments we make is intelligently designed to help you perform your best.
If you are as serious about your game as we are, then Yonex Apparel Innovations is here to help take you to the next level.
As warm air rises, cold air enters into open areas. Based on this fact, new Yonex Air Release technology has greatly improved ventilation in our shirts. Mesh in the back of the neck provides high ventilation, pushing out body heat. Meanwhile, fresh air is taken in through mesh equipped on the side of the shirt from the bottom to the armpits, keeping you cool under severe heat.

**Sweat Absorbent and Quick Drying**
**Stay Dry and Light**
Fabric that wicks away moisture and keeps you dry.

*Tested by BOKEN QUALITY EVALUATION INSTITUTE.*

**UV Reduction**
**Outstanding Ultraviolet Interception**
Yonex clothing intercepts infrared radiation and approximately 92%* of ultraviolet, minimizing heat build-up during play.

*Yonex Lab test of Infrared Absorption and Ultraviolet Transmittance.

**Stretch**
**Flexible, Forgiving and Fashionable**
Innovative stretch material allows for free movement that supports your active play.

**Antistatic**
**Avoid the Discomfort of Static Electricity**
Carbon impregnated conductor fibers are woven into the clothing to remove static electricity build-up.

**Precision Move**
**Easy to Move**
Due to special cutting provides to maximize your performance, reduce stress on arm swing, quick and smooth step.

**Antibacterial and Deodorant**
**Protect against Bacteria**
Protects against bacteria and reduces unpleasant odours.

**Polygiene**
**Stay Fresh and Odor-Free**
Woven into the fabric, this odor control tech keeps you fresh and odor-free even after intense play.

**VeryCool**
**A Cool Way to Beat the Heat**
By using cooling material Xylitol, VERYCOOL clothing from Yonex absorbs heat and perspiration, providing a significant cooling effect during exercise. No matter what the ambient temperature, VERYCOOL lowers body heat by 3°C for cooler play*.

*Data from Unitika Garments Technology & Research Laboratories Ltd.

**VeryCold**
**Keep Cool, Dry and on Top of Your Game**
A special hydrophilic fiber moves moisture from the skin to the fabric’s surface. Along with its quick drying property, VERYCOLD keeps you cool and dry at all times.

**Polygiene**
**Support Your One Step Forward**
Designed to relieve pressure on the toes and support their stepping force. It wraps the entire foot with moderate pressure, eliminating sock loosening in shoe.

As an industry leader, we use our unique innovations to create new sustainable solutions for the environment and our customers around the world.

**ATHLETE: LUCAS MAZUR**

**HOW OLD WERE YOU WHEN YOU STARTED PLAYING BADMINTON?**

“When I was 12 years old at school and I immediately liked it.”

**HOW DID YOU FEEL WHEN YOU STARTED PLAYING BADMINTON?**

“Back then I was also playing rugby but I liked that badminton was an individual sport, which felt like a dual to me. The first individual sport I encountered was badminton, and I never stopped ever since.”

**WHAT DO YOU LIKE ABOUT BADMINTON NOW?**

“I love the sport of dueling, especially the mental aspect but also the tactical aspect in this sport. The game with the opponent, the looks, the encouragement, being able to read his game like in a chess game.”

**WHAT IS YOUR BIGGEST GOAL RIGHT NOW?**

“I hope to make a double history by winning at both Tokyo 2020 and Paris 2024, which would be my greatest wish as an athlete.”
The connection between your hand and the racquet is often overlooked but can make the biggest difference.

Yonex designs a range of overgrips to fit every player’s preference. From Wet Super Grap - Yonex’s most popular overgrip that has been sold enough to wrap around the world five times - to Dry Super Grap, which wicks away moisture and provides a dry feeling even in humid conditions, every Yonex overgrip is designed to make the connection between your hand and your racquet one you can trust.

Since its launch in 1987, the Wet Super Grap has become Yonex’s best-selling overgrip, having sold enough grips to wrap five times around the earth.

MUSCLE POWER SUPPORTER products are designed for sports application and not intended to provide support or benefit for daily use.
"TOGETHER, WE HAVE THIS UNIQUE OPPORTUNITY TO PROMOTE BADMINTON GLOBALLY WITH THE AIM OF MAKING IT EVEN MORE POPULAR”

LEE CHONG WEI (MAS)

The Legends’ Vision initiative brings together superstars from past and present with a mission of introducing badminton to new audiences and igniting a lifelong passion for the sport. Founded by Lee Chong Wei, Lin Dan, Peter Gade, Taufik Hidayat and Lee Yong Dae, this World Tour offers fans the opportunity to be inspired by The Legends at coaching clinics, Q&A talks and exhibition matches.

Through interactive events that get people excited about the sport of badminton, the Legends’ Vision leaves a lasting legacy in every country it visits. Since the Legends’ Vision tour began in 2015, its success in attracting new badminton fans from all corners of the globe has been unparalleled, and we hope that this will continue to grow as we add more events to the tour in the very near future.

In our most recent installment, the Legends’ Vision World Tour swept through three major Canadian cities, leaving an indelible mark on the country’s badminton landscape. Toronto, Vancouver, and Calgary played host to these impactful events, bringing together badminton legends from around the world for a mesmerizing display of skill and junior growth.

To learn more about this initiative, head to Legends.Yonex.com.

## Yonex Recommended Stringing Instructions

### AX99-P, AX99-T, AX99-G, AX99-PL

**Main:**

- Start from top center, keep on stringing until B9 (skip A7, A9 & A11). Go through B12, directly to A16, and then straight to A16, down to B10 and tie off at B8. (Opposite side: the same procedure).

**Cross:**

- Make a knot at B6 and start crosses from B9. Keep on stringing until A7 (skip A12 & A15), then directly to A5 and tie off.

### AX02A, AX02C, AX02F, AXE13

**Main:**

- Start from top center, keep on stringing until B9. Go through B12, directly to A11, and then straight to A10, down to B10 and tie off at B8. (Opposite side: the same procedure).

**Cross:**

- Make a knot at B6 and start crosses from B9. Keep on stringing until A7 (skip A12 & A15), then directly to A5 and tie off.

### AX100GG, AX77-T, AX77-PL, AX22RX, AX22F, AX22LT

- AX100G, AX77-T, AX77-PL, AX22RX, AX22F, AX22LT

**Main:**

- Start from top center, keep on stringing until B9 (skip A8 & A10). Go through B12, directly to A12, and then straight to A12, down to B10 and tie off at B8. (Opposite side: the same procedure).

**Cross:**

- Make a knot at B6 and start crosses from B9. Keep on stringing until A8 (skip A11 & A9), then directly to A5 and tie off.

### AX01A, AX01C, AX01F

**Main:**

- Start from top center, keep on stringing until B9 (skip A8 & A10). Go through B12, directly to A12, and then straight to A12, down to B10 and tie off at B8. (Opposite side: the same procedure).

**Cross:**

- Make a knot at B6 and start crosses from B9. Keep on stringing until A8 (skip A11 & A9), then directly to A5 and tie off.

### NF-800PL, NF-700, NF-370SP, NF-270SP, NF-170LT

**Main:**

- Start from top center, keep on stringing until B9 (skip A8 & A10). Go through B12, directly to A12, and then straight to A12, down to B10 and tie off at B8. (Opposite side: the same procedure).

**Cross:**

- Make a knot at B6 and start crosses from B9. Keep on stringing until A8 (skip A11 & A9), then directly to A5 and tie off.

- Toe Assist Shape
- Ergoshape
- Inner Bootie
- Round Sole
- Hexagrip Sole
- Semi One-piece Sole

**SOLE**
- Hexagrip
- Lightweight sole material that provides greater grip for agile stable footwork.

**POWER CUSHION**
- By improving shock absorption, our POWER CUSHION technology is designed for faster footwork that transfers impact into energy.
- POWER CUSHION
- A lightweight, impact-absorbing material developed independently by Yonex which quickly returns to its original shape after receiving a shock load, converting the shock energy into power for fast and light footwork.

**INSOLE**
- Synchro-Fit Insole
- Reduces the gap between the foot and shoe with extra support around the heel, for maximum grip, comfort and performance.
