#### To go far beyond ordinary begins with curiosity, filled with endless possibilities.

The sky invites us to imagine beyond what we can see, While the ground keeps us steady, guiding each decision with purpose.

it sets us on a journey.

challenges as opportunities, is always closer than we think.

## FAR BEYOND **ORDINARY**

Toward a horizon of boundless blue and grounding green,

Progress here is rarely linear,

- always accelerating and decelerating—
- Where grand ideas meet meticulous exploration,
- turning the unusual into the essential,
- Transforming raw energy into pinnacle power.
- It's crafted in milligrams and millimeters—
- A balance of graphite, resin, and paint, each layer fine-tuned,
- Every fiber placed to bring out the best in every swing.

Walking with a rhythm of quick trials,

- insights gained, and constant refinement,
- A quiet resolve to push forward when pausing would be easier.
- The horizon doesn't take us to a single destination-
- A journey where going far is about seeing
- And believing the entrance to the next breakthrough

#### SIGNATURE YONEX TECHNOLOGY SINCE 1980

#### **7% LARGER SWEET SPOT**

Developed over 30 years ago, the ISOMETRIC<sup>™</sup> design increases the sweet spot by 7%\*. Compared to a conventional round frame, a square-shaped ISOMETRIC<sup>™</sup> racquet generates a larger sweet spot by optimizing the intersection of the main and cross strings. ISOMETRIC<sup>™</sup> technology delivers greater control without sacrificing power.

#### **D.P.S.** Oval Pressed Shaft

First introduced in 1969 with the T-7000 - our first aluminum tennis racquet - the Oval Pressed Shaft (OPS) is still incorporated into our most popular racquet series today. The Oval Pressed Shaft is designed to give players more spin, control, and feel. The shaft flexes at impact, increasing dwell time and minimizing vibrations.

#### REVOLUTIONARY GRAPHITE

Staying true to our roots, our graphite is sourced and engineered in Japan, giving our research and development team the opportunity to utilize a wide range of materials that suits players of all levels.

#### 2G-Namd<sup>™</sup> Flex Force

Aggressive, attacking spin for pinpoint control is achieved through a carbon nanotube structure that binds the graphite fibers together, which reduces energy loss. Due to its resilient properties, the material flexes and provides quick snapback.

Namd™ is technology developed by Nitta Co., Ltd. to uniformly disperse carbon nanotubes in carbon fiber composites.

MINOLON is made using threads spun by bagworms (minomushi in Japanese), featuring incredibly fine strands held together by an adhesive substance, enabling the formation of a net-like structure. The texture of material is soft and smooth to ensure a plush feel with every shot on the court. This innovative material combines both softness and strength, and the use of this material in products represents a groundbreaking technology, the first of its kind in the world.

\*MINOLON is a material developed by Kowa Company. Ltd.

ISOMETRIC<sup>™</sup> is a trademark of Yonex Co., Ltd. \*Tested by Yonex

Designed to produce flex and power, 2G-Namd<sup>™</sup> Speed is developed from high modulus graphite fibers bound with CNTs, resulting in a material that transfers energy into quick snapback.

Namd<sup>™</sup> is technology developed by Nitta Co., Ltd. to uniformly disperse carbon nanotubes in carbon fiber composites.

First used in our snowboards to reduce vibrations at impact, Vibration Dampening Mesh (VDM) is now used in four of our racquet series. VDM is a stretchy mesh material that is wrapped around the graphite within the grip to filter unwanted vibrations and improve touch and precision.

# POWER **PLAY FULL POWER**

The eighth generation of the EZONE series brings explosive power with the largest sweet spot in EZONE history and an unparalleled plush feel. This series is suitable for a wide range of players, from juniors and recreational players to the top players in the world.

## CONTROL PERCEIVE. CONTROL. CREATE.

The PERCEPT racquet series caters to the demands of mid to advanced-level players, who seek precise ball and trajectory control. Players can "Perceive, Control, Create" with PERCEPT by enhancing their ability to feel the ball, improve their control, and create their own distinct game on the court.

#### servo filter

PROVIDING VALUABLE FEEDBACK

A transparent and elastic film placed between graphite layers helps bond the layers. This unique film also absorbs unwanted vibrations, providing multiple benefits to the racquet.

SERVO FILTER is a vibration-absorbing film developed by the Mitsubishi Chemical Group, which has high bonding properties with graphil and excels in both flexibility and durability.

#### stiff racquet face design

FOR IMPROVED CONSISTENCY The frame employs more layers\* of graphite to increase rigidity of the racquet face. 3% more stability on the racquet face, providing improved consistency in ball trajectory.

> \*Compared to previous controloriented racquet models. \*Tested by Yonex

#### MORE FLEXIBILITY

The tapered and elongated box frame allows the shaft to flex comfortably, extending the ball pocketing duration for more feel and control. The flexibility is enhanced by the "2G-Namd<sup>™</sup> Flex Force," a highly elastic graphite that enables 15%\* more flexibility on the racquet shaft.

#### INVESTING IN THE FUTURE OF TENNIS

Vamos-J is a global camp that aims to promote tennis and develop high-performance young players through unique programs and life experiences.

Since 2011, Vamos\*J has welcomed thousands of participants and expanded its presence all around the world to offer young players access to world-class trainers and coaches, professional clinics, and guidance on the mental game. Vamos•J alumni include current ATP and WTA players like **Belinda Bencic** (SUI), **Jaume Munar** (ESP), and **Olga Danilovic** (SRB), who credit Vamos•J for impacting their junior careers before turning professional.

Through initiatives like Vamos J, Yonex is proud to support aspiring professionals and help the dreams of young players come true.

#### JUNIOR PRODUCTS

Properly introducing tennis to younger players is critical. These three progressive stages train players to develop a range of physical skills, as well as gradually learning the tactical and technical elements of tennis on smaller courts using slower balls.
